Change in Trade Unions R. Undy, V. Ellis, W. E. J. McCarthy, A. M. Halmos, 2022-12-30 Originally published in 1981 this book explains the factors which precipitated and effected changes in the major dimensions of union activity in Britain since 1960 The authors use a series of comparative case studies to examine change in the government growth mergers character and bargaining structures of British unions The central theme of the book is that unions are far freer to determine their own behaviour than was commonly supposed In examining changes in unions the authors develop concepts and terms which provide new insights into union behaviour *Change in Trade Unions* W. E. McCarthy, A. M. Halmos, Roger Undy, V. Ellis, 1981

Unionization and Union Leadership Paul Smith, 2013-01-11 The focus of this book is the process of unionization in the road haulage industry in particular the role of leadership in determining the quality of union organization It analyzes the early history of road haulage unions the creation of the TGWU the failure to organize the industry during the 1930s and the consequent reliance upon statutory regulation of wages and conditions and the subsequent institutional stasis of the TGWU during the 1950s The transformation and expansion of union organization during the period of 1963 1973 conceived as the mobilization of collective power by workers within the employment relationship is explored in case studies of TGWU branches in Birmingham Liverpool and London and within the wider context of TGWU The retrenchment of union organization as a result of recession and Conservative government legislation 1980 1994 is explored The book concludes with an assessment of theories of unionization and democracy and the role of leadership with reference to the historical development of British trade unionism The research utilizes oral and documentary sources including hitherto unused archives of the TGWU and the Road Haulage Association

Changing Prospects for Trade Unionism Peter Fairbrother, Gerard Griffin, 2013-10-28 Trade union movements in many countries face uncertain futures After three decades of extensive economic restructuring at both national and international levels often accompanied by major legislative reforms the way forward for unions is unclear Throughout the 1980s and into the 1990s in most developed economies union membership declined massively and union leaders and their members lost their former prominence and their place in the polity Will trade unions be able to re establish their past salience in the bargaining arena and in the polity Or given the uncertainties of internationalized economies and states will the first decade of this new century see further declines in union strength and power This book examines these and related questions by exploring the background current roles and prospects of trade unions in six English speaking countries

the Financial Services Sector Gregor Gall, 2017-11-30 In recent years there has been an acute crisis of worker representation in the finance sector in Britain Labour union and staff association membership and density has fallen collective organisation has experienced dislocation and disorganisation and worker self confidence has been sapped Prior to this there was a sense of an identifiable trajectory towards greater unionateness by labour unions and staff associations with the sector moving towards growing self identification of employees as workers and the use of traditional tools of collective bargaining such as threats of strikes and strikes themselves This study documents and explains these changes in wider historical terms providing invaluable reading for those interested in the future of both the labour movement and the finance

sector

The Politics of Bargaining Jeremy Waddington, 2013-12-02 Tracing developments in British trade union structure over almost 100 years with specific reference to the merger process this book shows how the underlying processes of change are cyclical It therefore provides a backdrop for understanding some of the options for structural change that may be adopted by trade unions in the future Establishing a framework within which the historical development of the merger process may be understood the book identifies three central sets of relationships the bargaining position of unions relative to employers and the state the bargaining position of a union relative to competitor unions and factional bargaining within unions Collectively the three relationships are referred to as the politics of bargaining and are used to explain changes in the rate and character of trade union structural development British Industrial Relations Gill Palmer, 2024-10-01 British Industrial Relations 1983 provides a comprehensive and balanced approach to British industrial relations an often controversial subject with a variety of academic interpretations which achieved a large significance in national politics The author draws on political and social theory to explain both the state of British industrial relations in the 1980s and the conflicting prescriptions for change Trade unions and collective bargaining are placed in the context of the inevitable development of group negotiation within complex organisations The often neglected importance of management strategy in the design of work and in the development of the British system is emphasised and different interpretations on the state's role in industrial relations are fully explored This book has a broad ranging approach using the latest developments in political labour process trade union and organisation theories relevant to the understanding of industrial relations British institutions are the main focus of study but illustrations from Japan the USA and Germany are also used and the importance of an historical perspective is underlined

A History of British Industrial Relations, 1939-1979 Chris Wrigley, 1996 This book offers a major assessment of British industrial relations between the outbreak of WW2 and the advent of Margaret Thatcher's government in 1979 It examines the role of the government and other organisations in industrial relations

Britain in the 1970s Richard Coopey, Nicholas Woodward, 2025-06-01 Britain in the 1970s 1996 provides an objective appraisal of the workings and failings of the British economy in the 1970s Seen as a turning point in the postwar economy the 1970s have come under increasing attention from historians economists and political scientists By examining the decade from a number of directions this book confronts debates about for example the decline of economic performance the origins of monetarism and deregulation the role of inflation and the importance of external forces in shaping the British economy Other issues addressed include the development of economic opinion industrial policy mergers and acquisitions union relations entry into the Common Market and the defence economy

Modern Labour Economics Peter Sloane, Paul L. Latreille, Nigel O'Leary, 2013 Labour economics as a discipline has changed dramatically in recent years Gone are the days of a job for life These days firms and employees are part of a less regulated more fluid and more international labour market Knowledge training human resource development and human capital are all major factors on the contemporary scene This

new textbook is the first properly international textbook to reflect these swingeing changes Its key areas of concentration include the increasing importance of human capital including education and occupational choice the major subdivision of personnel economics including economic inactivity and absenteeism comparative cross country studies and the impact of globalization and migration on national labour markets equal opportunities and issues of discrimination on the basis of race gender and disability conflict at work including both strikes and uniquely individual disputes Other issues explored include the supply and demand of labour wages the current role of trade unions bargaining and conflict and working time The book is written in a clear accessible way with some mathematical exposition reflecting the text's grounding in current microeconomic theory The book also contains case studies designed to illuminate theoretical concepts and exercises and discussion questions to test the students understanding of the various concepts outlined in the text

The Two Majorities and the Puzzle of Modern American Politics Byron E. Shafer, 2003 Where did the Era of Divided Government come from What sustains split partisan control of the institutions of American national government year after year Why can it shift so easily from Democratic or Republican presidencies coupled with Republican or Democratic Congresses How can the vast array of issues and personalities that have surfaced in American politics over the last forty years fit so neatly within indeed reinforce the sustaining political pattern of our time These big questions constitute the puzzle of modern American politics The old answer a majority and a minority party plus dominant and recessive public issues will not work in the Era of Divided Government Byron Shafer a political scientist who is regarded as one of the most comprehensive and original thinkers on American politics provides a convincing new answer that has three major elements These elements in combination not divided government as a catch phrase are the real story of politics in our time The first element is comprised of two great sets of public preferences that manifest themselves at the ballot box as two majorities The old cluster of economic and welfare issues has not so much been displaced as simply joined by a second cluster of cultural and national concerns The second element can be seen in the behavior of political parties and party activists whose own preferences don't match those of the general public That public remains reliably left of the active Republican Party on economic and welfare issues and reliably right of the active Democratic Party on cultural and national concerns The third crucial element is found in an institutional arrangement the distinctively American matrix of governmental institutions which converts those first two elements into a framework for policymaking year in and year out In the first half of the book Shafer examines how dominant features of the Reagan first Bush Clinton and second Bush administrations reflect the interplay of these three elements Recent policy conflicts and institutional combatants in Shafer's analysis illuminate this new pattern of American politics In the second half he ranges across time and nations to put these modern elements and their composite pattern into a much larger historical and institutional framework In this light modern American politics appears not so much as new and different but as a distinctive recombination of familiar elements of a political style a political process and a political conflict that has

been running for a much much longer time Union Organizing Gregor Gall,2003-08-29 After many years of indifferent decline trade union membership is now being revitalized strategies known as union organizing are being used to recruit and re energize unions around the globe This book considers exactly how trade unions are working to do this and provides a much needed evaluation of these rebuilding strategies By comparing historical and contemporary case studies to assess the impact of various organizing campaigns this book assesses the progress of unions across Europe and America It raises key debates about the organizing culture and considers the impact of recent union recognition laws on employers and the government s Fairness at Work policy A topical and in depth study into the experiences of trade unions across Europe and America this is a comprehensive and thought provoking book which is essential reading for those in the industrial relations field **Facing Up to Thatcherism** Mike Ironside,Roger V. Seifert,2000 Throughout the 1980s Margaret Thatcher dominated political life in the UK This work analyzes the responses of NALGO The National and Local Government Officers Association members activists leaders and officials to the government s public sector reform and restructuring programme
