Changes In Scenery:

Changes in Scenery Thies Schröder, 2002 Landscape architecture's potential does not lie in a unified profession but in polarization. This key idea of author Thies Schröder is reflected in the diverse approaches of the 14 offices whose work we now present in updated portraits of improved quality. Reactions to Changes in Scenery Thies Schröder's book shows us that we are at a very specific moment of change and exchange in the history of European landscape architecture. Christophe Girot, Swiss Federal Institute of Technology, altogether a refreshing read. It is to be hoped that it will find an audience outside landscape architecture circles. Mainstreaming Landscape through the European Landscape Convention Karsten Jorgensen, Morten Clemetsen, Anne-Karine Halvorsen Thoren, Tim Richardson, 2015-11-19 The European Landscape Convention has introduced a Europe-wide concept of protection, management and planning of all landscapes, not just the outstanding ones. This book reflects on the background to the establishment of the convention, takes a critical look at examples and experiences of its implementation and discusses future developments for the convention and the management of landscapes in Europe. A decade after the creation of the European Landscape Convention, this book asks how it has influenced the governance and development of European landscapes and what role it will play in the coming years. The authors provide a wide range of analyses, reflections and visions informed by their diverse experiences of researching, working with and using the convention. The sixteen essays are organised into three sections focusing on the fundamental concepts and values behind the convention, current projects and experiences of implementation and prospects for future developments.
