that this book is a a masterful analysis of a systematically connected group of organizations seeing them not as separate entities but as a system whose organizational routines and peculiarities we couldn t understand if we didn t know their external connections as well as their internal workings Its research methodology was painstaking The officials of the new system s components especially the wardens of the individual prisons had many questions on their minds You couldn t answer those questions by observing one of those prisons for a year or two Not so in the author s decade of research leading up to this work Indeed Becker concludes Messinger s study provides the blueprint for more accurate and persuasive analyses of large organizations of every kind Simon writes in the new afterword that this book remains an important contribution to understanding the nature of imprisonment and more broadly to the study of punishment in modern society providing a crucial background for rethinking the recent history of prisons and particularly the rise of mass incarceration which has seen the proliferation of multi prison systems extensions of bureaucratic management within prisons and the abandonment of rehabilitation as a central justification for punishment Simon adds Creating a sociological analysis for such a complex extended network required a break with traditional sociological thinking and going further in suggesting another analytic shift from studying the prison system to studying the broad array of agencies and authorities that made up the correctional establishment Policymakers practitioners and scholars who are interested in a better understanding of the relationship between correctional systems their comprising organizational components and practices will learn much from this study It provides a truly original contribution to our sociological understanding of how formal organizations comprising a correctional system evolve and operate through a series of relationships ultimately producing control of the system itself its prisons and its inmates Given the current focus on evidence based justice Messinger s documentation and unique interpretation of the organizational dynamics interconnections and dependencies within correctional systems are clearly relevant and crucial to the successful implementation of such translational criminology reforms Thomas G Blomberg Dean and Sheldon L Messinger Professor of Criminology College of Criminology and Criminal Justice Florida State University Author *Advancing Criminology* Part of the Classics of Law Society Series from Quid Pro Books this foundational book is at last available to a general audience researchers and students in eBook form Also available in new paperback and hardcover editions 2016 [Changing Concepts of Crime and Its Treatment](#) Howard League for Penal Reform,1966 Symposium compiled to mark the centenary of the Howard League for Penal Reform **The Detention and Jailing of Juveniles** United States. *The Social Reality of Crime* Richard Quinney, **The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society** Helen Wells, 2022-03-26 The Fast and The Furious Drivers Speed Cameras and Control in a Risk Society presents a sociological and criminological perspective critical to understanding the driver s role at the centre of road safety interventions Such an approach is it is argued as crucial to an understanding of attempts to reduce road crashes deaths and injuries as approaching such questions from an engineering or educational perspective The book offers an explanation for the continued debate about one road safety intervention the speed camera by situating that debate within contemporary literature about the risk society Beck 1992 and more broadly understood experiences of risk faced on a daily basis by drivers Rather than a focus on risk as something that can be objectively assessed measured and managed separately from the social context in which it is encountered it suggests that risk is something that permeates this particular debate from every angle The book achieves its aims by utilising sociological and criminological perspectives to investigate issues such as the social context in which it is possible for drivers to reject official scientific expertise about crash causation and camera effectiveness the self defined respectability of the population being problematised and its juxtaposition with a proper police focus on real criminals the reconceptualisation of law breaking as risk taking rather than inherently wrong behaviour and its consequences for the enforcement of laws based on risk assessment the experience of being controlled by technology

and of receiving what is essentially automated justice These and other issues are explored and suggested as illuminating of both the real concerns underpinning this debate and potentially instructive for future attempts to control risky behaviour both within and beyond a road safety context
