Changing Paths International Development And The New Politics Of Inclusion:

Changing Paths Peter P. Houtzager, Michael Peter Moore, 2009-12-14 After two decades of marketizing an array of national and international actors have become concerned with growing global inequality the failure to reduce the numbers of very poor people in the world and a perceived global backlash against international economic institutions This new concern with poverty reduction and the political participation of excluded groups has set the stage for a new politics of inclusion within nations and in the international arena The essays in this volume explore what forms the new politics of inclusion can take in low and middle income countries The contributors favor a polity centered approach that focuses on the political capacities of social and state actors to negotiate large scale collective solutions and that highlights various possible strategies to lift large numbers of people out of poverty and political subordination The contributors suggest there is little basis for the radical polycentrism that colors so much contemporary development thought They focus on how the political capabilities of different societal and state actors develop over time and how their development is influenced by state action and a variety of institutional and other factors The final chapter draws insightful conclusions about the political limitations and opportunities presented by current international discourse on poverty Peter P Houtzager is a Fellow at the Institute of Development Studies University of Sussex He has been a visiting scholar at the Center for Latin American Studies University of California Berkeley visiting lecturer at Stanford University and lecturer at St Mary's College A political scientist with broad training in comparative politics and historical institutional analysis he has written extensively on the institutional roots of collective action Mick Moore is a Fellow at the Institute of Development Studies University of Sussex as well as Director of the Centre for the Future State He has been a visiting professor at the Massachusetts Institute of Technology His professional interests include political and institutional aspects of poverty reduction and of economic policy and performance the politics and administration of development and good government

Understanding India's New Political Economy Sanjay Ruparelia, Sanjay Reddy, John Harriss, Stuart Corbridge, 2011-03-09 A number of large scale transformations have shaped the economy polity and society of India over the past quarter century This book provides a detailed account of three that are of particular importance the advent of liberal economic reform the ascendance of Hindu cultural nationalism and the empowerment of historically subordinate classes through popular democratic mobilizations Filling a gap in existing literature the book goes beyond looking at the transformations in isolation managing to Explain the empirical linkages

between these three phenomena Provide an account that integrates the insights of separate disciplinary perspectives Explain their distinct but possibly related causes and the likely consequences of these central transformations taken together By seeking to explain the causal relationships between these central transformations through a coordinated conversation across different disciplines the dynamics of India's new political economy are captured Chapters focus on the political economic and social aspects of India in their current and historical context The contributors use new empirical research to discuss how India's multidimensional story of economic growth social welfare and democratic deepening is likely to develop This is an essential text for students and researchers of India's political economy and the growth economies of Asia
