Changing Perspectives In The Scientific Study Of Religion:

Changing Perspectives in the Scientific Study of Religion Allan W. Eister, 1974 This volume in reexamining the current approaches to the study of religious institutions serves the important function of periodically reassessing the direction of our research

The Study of Religion and its Meaning J.E. Barnhart, 2011-11-21 Since its founding by Jacques Waardenburg in 1971 Religion and Reason has been a leading forum for contributions on theories theoretical issues and agendas related to the phenomenon and the study of religion Topics include among others category formation comparison ethnophilosophy hermeneutics methodology myth phenomenology philosophy of science scientific atheism structuralism and theories of religion From time to time the series publishes volumes that map the state of the art and the history of the discipline

The Science of Religion: A Defence Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion

From Civil to Political Religion Marcela Cristi, 2006-01-01 Prompted by the shattering of the bonds between religion and the political order brought about by the Enlightenment Jean Jacques Rousseau devised a new religion civil religion to be used by the state as a way of enforcing civic unity Emile Durkheim by contrast conceived civil religion to be a spontaneous phenomenon arising from society itself a non coercive force expressing the self identify or self definition of a people In 1967 the American sociologist Robert Bellah rediscovered the concept and applied it to American society in its Durkheimian form Ever since Bellah's publication most authors have sought to explain civil religion in terms of an alleged spontaneous integrative role for society They have emphasized the religious and cultural dimension of the concept but failed to give due consideration to its political ideological foundations Thus the coercive potential of civil religion has received little attention or has been wrongly relegated to Third World countries Cristi provides a critique of the civil religion thesis and identifies the most basic deficiencies of literature on this topic By contrasting Bellah's Durkheimian conception with

Rousseau's original formulation the author discloses the dubious conceptual and empirical basis of the former. She demonstrates the need to rethink Bellah's thesis in the light of a reinterpretation of Rousseau's and Durkheim's classical approaches and substantiates her critique with a brief comparative survey of state directed civil religions and with an informative case study of civil religion in Pinochet's Chile.

Understanding Soviet Society Michael Paul Sacks, Jerry G. Pankhurst, 2013-10-15 First Published in 1988 *Understanding Soviet Society* has grown out of the authors experience as sociologists researching and teaching about the Soviet Union. Meant initially as an update to *Contemporary Soviet Society: Sociological Perspectives* from 1980 this became a new volume because of the addition of six new authors but also because of the major changes occurring in the USSR today that in many ways necessitated new approaches. It examines the fundamental institutions of Soviet society from work and social welfare to politics and the Party in order to provide an objective understanding of the social underpinnings of the Soviet System.

Secularization Karel Dobbelare, 2002 In an epoch in which religion has explicitly and sometimes violently returned to the forefront of the global public scene the process of secularization that has fundamentally marked Western and particularly European societies demands attention and analysis. This book written from a sociological perspective takes up that challenge. The author distinguishes three levels of secularization: Societal secularization which is a typical consequence of the processes of modernity and of programmes of laicisation promoted by political parties; Individual secularization that is manifested in the decline of church commitment occurring as individuals re compose their personal beliefs and practices in a religion à la carte and as the individual's meaning system becomes compartmentalized and religion is separated from other areas of life; A third level organizational secularization covers the incidence of the adaptation of religious bodies to secularized society. The entire work is marked by meticulous description and analysis of numerous theoretical and empirical studies and by due recognition of the intricate relationship between levels of secularization and the impact of various actors in the many conflicts over religion's roles.

Politics and Religious Consciousness in America Kelly, 1984

The Cult and Science of Public Health Kevin Dew, 2012 In contemporary manifestations of public health rituals and events people are being increasingly united around what they hold in common: their material being and humanity. As a cult of humanity public health provides a moral force in society that replaces traditional religions in times of great diversity or heterogeneity of peoples activities and desires. This is in contrast to public health's foundation in science particularly the science of epidemiology. The rigid rules of scientific evidence used to determine the cause of illness and disease can work against the most vulnerable in society by putting sectors of the population such as underrepresented workers at a disadvantage. This study focuses on this tension between traditional science and the changing vision articulated within public health and across many disciplines that calls for a collective response to uncontrolled capitalism and unremitting globalization and to the way in which health inequalities and their association with social inequalities provides a political rhetoric that calls for a new redistributive social programme.

Drawing on decades of research the author argues that public health is both a cult and a science of contemporary society

Religion, Globalization and Culture Peter Beyer, Lori Gail Beaman, 2007 The topic of religion and globalization is complex susceptible to a great variety of approaches This book combines contributions from many authors who examine a wide range of subjects ranging from overall theoretical considerations to detailed regional perspectives No single understanding of either religion or globalization is privileged

Holy Nations and Global Identities Annika Hvithamar, Margit Warburg, Brian Arly Jacobsen, 2009 Combining the insights of scholars from the fields of religion history sociology and political science this book brings together genuine theoretical explorations and original case studies on civil religion nationalism and globalization
