Changing Places Environment Development And Social Change In Rural Honduras:

Changing Places William Meverell Loker, 2004 *Changing Places* describes and analyzes patterns of environmental and social change in a region of rural Honduras over a 15 year period 1983-1998. The people of this region were subject to economic dislocations caused by the construction of a major hydroelectric dam that flooded more than 6 000 hectares of mostly agricultural land. In addition residents have been forced to adapt to broader processes of rapid social and economic change associated with globalization over the same period. These responses include increased rates of employment in maquiladora plants and migration to the U S. The book examines the environmental consequences of the dam, the response of local people to dam induced changes, the ecological effects of changing land use patterns and the challenges to local livelihoods posed by globalization. Loker looks at the failure of post dam resettlement as well as subsequent environment and development projects in the region and presents an analysis of the role of structural power, social capital and community divisions in frustrating development efforts. *Changing Places* examines both the social and environmental dimensions of the intersection between the local and the global. The book will be of interest to scholars and professionals in a variety of fields including anthropology, geography, environmental studies, international relations, international development policy, students of globalization and global environmental problems, deforestation, species loss and those interested in Latin America generally and Central America specifically. His multifaceted approach truly captures the story of a community experiencing substantial change. *Human Ecology* Andre Gunder Frank and *Global Development* Patrick Manning, Barry K. Gills, 2013-07-03

Containing previously unpublished material, a review of the legacy and work of Andre Gunder Frank *The Broken Village* Daniel R. Reichman, 2011-11-15. In *The Broken Village* Daniel R. Reichman tells the story of a remote village in Honduras that transformed almost overnight from a sleepy coffee growing community to a hotbed of undocumented migration to and from the United States. The small village called here by the pseudonym La Quebrada was once home to a thriving coffee economy. Recently it has become dependent on migrants working in distant places like Long Island and South Dakota who live in ways that most Honduran townspeople struggle to comprehend or explain. Reichman explores how the new migration economy has upended cultural ideas of success and failure, family dynamics and local politics. During his time in La Quebrada, Reichman focused on three different strategies for social reform: a fledgling coffee cooperative that sought to raise farmer incomes and establish principles of fairness and justice through consumer activism; religious campaigns for personal morality that were intended to counter the corrosive effects of migration; and local discourses about migrant greed that labeled migrants as the cause of social crisis rather than its victims. All three phenomena had one common trait: They were settings in which people presented moral visions of social welfare in response to a perceived moment of crisis. *The Broken Village* integrates sacred and secular ideas of morality, legal and cultural notions of justice to explore how different groups define social progress.

Ensor, 2009-12-15 Around the world disaster vulnerability is on the rise The incidence and intensity of disasters have increased in recent decades with lives being shattered and resources being destroyed across broad geographic regions each year As it swept across the Honduran landscape the exceptional size power and duration of Hurricane Mitch abruptly and brutally altered the already diminished economic social and environmental conditions of the population In the aftermath of the disaster a group of seven socio environmental scientists set out to investigate the root causes of the heightened vulnerability that characterized pre Mitch Honduras the impact of the catastrophe on the local society and the subsequent recovery efforts Edited by Marisa O Ensor this volume presents the findings of their investigation The Legacy of Hurricane Mitch offers a comprehensive analysis of the immediate and long term consequences of Hurricane Mitch in Honduras Based on longitudinal ethnographic fieldwork and environmental assessments this volume illustrates the importance of adopting an approach to disaster research and practice that places natural trigger events within their political cultural and socio economic contexts The contributors make a compelling case against post disaster recovery efforts that limit themselves to alleviating the symptoms rather than confronting the root causes of the vulnerability that prefigured the disaster *The Statesman's Yearbook 2024* Palgrave Macmillan, 2024-01-03 Now in its 160th edition The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions **The Statesman's Yearbook 2023** Palgrave Macmillan, 2023-01-04 Now in its 159th edition The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions *The Statesman's Yearbook 2012* B.
