Changing Israel:

The Changing Agenda of Israeli Sociology Uri Ram, 2012-02-01 This study explores the changing agenda of Israeli sociology by linking content with context and by offering a historically informed critique of sociology as a theory and as a social institution. It examines on the one hand the general theoretical perspectives brought to bear upon sociological studies of Israel and on the other the particular social and ideological persuasions with which these studies are imbued. Ram shows how the agenda of Israeli sociology has changed in correlation with major political transformations in Israel: the long term hegemony of the Labor Movement up to the 1967 war, the crisis of the labor regime following the 1973 war and the ascendance of the right wing to governmental power in 1977. Three stages in Israeli sociology corresponding to these political transformations are identified: the domination of a functionalist school from the 1950s to the 1970s, a crisis in the mid 1970s and the profusion of alternative and competing perspectives since the late 1970s. Ram concludes with a plea for a new sociological agenda that would shift the focus from nation building to democratic and egalitarian citizenship formation. This book offers the first systematic and comprehensive overview of sociological thought in Israel and by doing so offers a unique interpretation of the social and intellectual history of Israel.

Changing Societies, Changing Party Systems Heather Stoll, 2013-11-25 This book studies how society shapes democratic political competition with a focus on the number of political parties. This stands in contrast to the prevailing approach of explaining cross national and longitudinal differences in political competition with political institutions such as the electoral system. The book develops the most general theory about how society shapes the number of parties to date as well as the most extensive measures of social heterogeneity which it uses to test its hypotheses.

Ideology, Party Change, and Electoral Campaigns in Israel, 1965-2001 Jonathan Mendilow, 2012-02-01 The tumultuous and rapid political change experienced by Israel since 1965 has been reflected in the history of its party system. In this book Jonathan Mendilow examines the party and party system transformations through the lens of the electoral campaigns that defined and reflected them. He shows that the relative stability of the dominant party system bequeathed from the pre independence era was shattered in the 1960s and replaced by cluster parties that vied for power in the ideological center only to decline and be replaced in turn in the 1980s and early 1990s by ideological party blocs locked in centrifugal competition. With the separate direct election of the prime minister since the mid 1990s there has been yet a third profound realignment in party structures, ideologies and modes of campaigning according to Mendilow.

Crossovers Shlomo Sharan, David Bāqay, Jewish history is replete with examples of how Jews have ignored repeated threats and acts of violence against them. That characteristic of Jews reflects their Messianic belief, but it lacks a basis in history. That belief has resisted change even in the face of threats that were obvious and that have endangered Jewish lives in the past. Contemporary anti-Zionists share this optimistic outlook. *War, Institutions, and Social Change in the Middle East* Steven Heydemann, 2000-12-01. Few areas of the world have been as profoundly shaped by war as the Middle East in the twentieth century. Despite the prominence of war making in this region, there has been surprisingly little research investigating the effects of war as a social and political process in the Middle East. To fill this gap, *War, Institutions, and Social Change in the Middle East* brings together an international and interdisciplinary group of scholars who explore the role of war preparation and war making on the formation and transformation of states and societies in the contemporary Middle East. Their findings pose significant challenges to widely accepted assumptions and present new theoretical starting points for the study of war and the state in the contemporary developing world. Heydemann's collaborators include political scientists, historians, anthropologists, and sociologists from the Middle East, Europe, and the United States. Their essays are both theoretically sophisticated and empirically rich, covering topics such as the effects of World War II on state-market relations in Syria and Egypt, the role of war in the rise of the Palestine Liberation Organization, the political economy of Lebanese militias, and the effects of the 1967 war on state and social institutions in Israel. The volume originated as a research planning project of the Joint Committee on the Near and Middle East of the Social Science Research Council.

This volume reflects upon Israel's troubled attempts to balance its desire to be different from a world that it needs and of which it also wants to be a legitimate member. *Foreign Assistance and Related Programs Appropriations for Year 1986: Agency for International Development* United States.
