HEALING A WOUNDED LEADER Wendell J. Davis Sr.,2013-05-16 Effective leadership is required in the twenty first

century churches as these churches are facing numerous issues due to ineffective leadership. In order to lead churches, wounds of leaders must be healed up in the Christian ministry. Today the churches of America are facing leadership issues because their leaders' wounds are not treated and healed up. This results in a critical crippling and catastrophic effect on the Christian Ministry. Those life-threatening wounds must be identified. The healing of the wounded leader is essential to the Spirit well-being of the people. The purpose of the study is to investigate the wounds faced by church leaders. The study also investigates that how these wounds affect church leadership. This study also identifies methods of healing of wounded leaders and interventions used from transforming wounded leaders into an active and effective leader. Many churches are facing numerous leadership issues due to leaders' wounds. Identification of this issue is important for the development and implementation of churches in America. This study helps in investigating the wounds among leaders and their relationship with leadership ineffectiveness. The study helps in identifying the meaning of wounds. This study helps in studying the impact of wounds on church leaders in detail. This study classifies wounds as divorces, childhood traumatic experiences such as rape, molestation and physical abuse through domestic violence, emotional abuse through verbal altercations and mental abuse from a sibling, parent, spouse, authority figure or partner in a relationship. For this study, mixed method was done. Survey, interview, questions and observational research were done. According to the participants, many of the transformational leadership concepts are transferrable into the church context, however including idealized influence which espouses the leader as a role model with high moral standards and ethical conduct and as one who considers the needs of others before his or her own. According to the participants, Old Testament suggested there are numerous examples of leadership development in the Old Testament; the short space available in this review will dictate a focus on one of the most obvious and well-known leadership examples. According to the respondents, personality is becoming more and more associated with leadership style and ability. This is particularly true when one is discussing the concept of transformational leadership. Due to leadership issues in American churches, Christian community is reluctant to visit their nearby churches regularly. The results depicted that due to past wounds or inner wounds, the church leaders are not able to have Holy spirits. The wounds must be healed up for attaining pure Holy spirits. If their wounds are properly healed up, then they can more firmly believe as the apostle on the supernatural healings, signs and miracles. The unhealed wounds of the church leaders hinder in the way of the leaders for praying for the humanity or for those who are suffering from hardships regularly. The lack of pastoral visitations of the members is due to the wounded souls of the leaders. For increasing the pastoral visitations of the members, the church leaders' wounds must be healed up by using various methods. Ineffective leadership is practicing in the churches; these leaders are not conducting the different counseling sessions for the Christian communities. The Christian communities are not interested in visiting churches because of the ineffective leadership. The ineffective leadership does not encourage Christian communities towards practicing God preaching at church. The church leadership is not effective to spiritually

inspire Christian communities the church leadership is not effective to initiate programs which are helpful for attracting and retaining Christian communities missionary programs are not being implemented by many American churches because of lack of effective church leadership
