Cyber Zen Gregory Price Grieve,2016-12-08 Cyber Zen ethnographically explores Buddhist practices in the online virtual world of Second Life Does typing at a keyboard and moving avatars around the screen however count as real Buddhism If authentic practices must mimic the actual world then Second Life Buddhism does not In fact a critical investigation reveals that online Buddhist practices have at best only a family resemblance to canonical Asian traditions and owe much of their methods to the late twentieth century field of cybernetics If however they are judged existentially by how they enable users to respond to the suffering generated by living in a highly mediated consumer society then Second Life Buddhism consists of authentic spiritual practices Cyber Zen explores how Second Life Buddhist enthusiasts form communities identities locations and practices that are both products of and authentic responses to contemporary Network Consumer Society Gregory Price Grieve illustrates that to some extent all religion has always been virtual and gives a glimpse of possible future alternative forms of religion *The Cultural Imaginary of the Internet* M. Yar,2014-05-12 Contemporary culture offer contradictory views of the internet and new media technologies painting them in extremes of optimistic enthusiasm and pessimistic concern This book explores such representations uncovering the roots of our cultural responses to the internet centred upon a profoundly ambivalent reaction to technological modernity **Transhumanism** David Livingstone,2015-09-02

Transhumanism is a recent movement that extols man s right to shape his own evolution by maximizing the use of scientific

technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA s mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie Lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill The Oxford Handbook of New Religious Movements James R. Lewis, Inga Bårdsen Tøllefsen, 2016 The Oxford Handbook of New Religious Movements both covers the current state of the field and breaks new ground Its contributors drawn from both sociology and religious studies are leading figures in the study of NRMs
