Chalk Lines The Politics Of Work In The Managed University:

Chalk Lines Randy Martin, 1998 An expanded edition of SOCIAL TEXT 51 which examines the current situation of academic labor in the United States **After Whiteness** Mike Hill, 2004 What comes after white becomes a minority in the United States *Education as Civic Engagement* Gary A. Olson, Lynn Worsham, 2012-08-16 Education as Civic Engagement Toward a More Democratic Society is a collection of ten essays examining education mostly higher education as civic engagement These essays are the finest works of scholarship on education published over the last decade in JAC an award winning journal of rhetoric politics and culture Collectively the works in this volume analyze in a substantive and rigorous manner a number of key issues in the politics of education **The American-style University at Large** Kathryn L. Kleypas, James I. McDougall, 2012-01-01 The focus of research on the globalization of higher education has historically been on universities within the United States More recently the focus has shifted to the international scene yet there remain few published works to document this phenomenon The American Style University at Large Transplants Outposts and the Globalization of Higher Education edited by Kathryn L. Kleypas and James McDougall is an intervention into current discussions concerning the role of the contemporary American style university in a global context The editors approach the subject from their own experiences as professors at an American style university in the Middle East They pull together essays from an impressively diverse list of contributors which examine the various ways that American models of higher learning have become instituted around the world The authors then explore ways that these new configurations help to define the university as a force that organizes develops and controls methods of education knowledge power and culture

Technology and the Politics of Instruction Jan Nesper, 2012-09-10 In this study of computer mediated instruction CMI in a U S research university that is the site of nationally known innovations in this area Jan Nesper traces the varying material and organizational entanglements of a constantly reconfiguring network of people things categories and ideas that are sometimes loosely sometimes tightly entangled in forms of CMI He unfolds how the different forms and meanings of CMI policy and practice were constructed over time across departments and in relation to students academic trajectories Tying together a range of issues usually separated in discussions of instructional technology and examining often slighted topics such as the articulations of local and national practices this book questions the common vocabulary for making sense of CMI and contributes to educational change theory by showing how CMI has evolved both from the top down and the bottom up Technology and the Politics of Instruction is distinctive in its multi level approach and in the breadth of its conceptual frame Departing from the mainstream research on instructional technology to focus on mundane and widespread forms of CMI PowerPoint slides CD ROMs self paced labs and the like Nesper views these from multiple standpoints not just what they mean for professors but also for administrators and students The effect is to displace the typical emphasis in CMI research from cutting edge high resource artifacts and systems the importance of which is not questioned to the politics and

organizational processes that shape the uses of such things This book is intended primarily for scholars and students in the fields of educational and more broadly organizational change the politics and sociology of education curriculum theory higher education and educational administration and will also interest instructional technologists and technology developers **A**

Integrated Science Michael E. Brint, David Marcey, Michael C. Shaw, 2008-11-02 Across science and engineering new opportunities are unfolding at the convergence of traditional fields To meet the demands for students with interdisciplinary education new undergraduate curricula have emerged Biomedical engineering for example builds upon foundations in biology physics chemistry and materials science coupled with engineering design principles In building successful interdisciplinary science programs however many questions must be addressed Although many resources exist for developing and implementing new academic programs there does not exist in a single volume that adequately address this important topic *Integrated Science New Approaches to Education* is a focused collection of essays addressing the myriad challenges associated with conceptualizing developing implementing and measuring the success of new undergraduate programs in interdisciplinary science and engineering fields This book will provide an overview of this process drawn from a broad perspective of experts within their respective fields

How the University Works Marc Bousquet, Cary Nelson, 2008-01-01 Uncovers the labor exploitation occurring in universities across the country As much as we think we know about the modern university very little has been said about what it s like to work there Instead of the high wage high profit world of knowledge work most campus employees including the vast majority of faculty really work in the low wage low profit sphere of the service economy Tenure track positions are at an all time low with adjuncts and graduate students teaching the majority of courses This super exploited corps of disposable workers commonly earn fewer than 16 000 annually without benefits teaching as many as eight classes per year Even undergraduates are being exploited as a low cost disposable workforce Marc Bousquet a major figure in the academic labor movement exposes the seamy underbelly of higher education a world where faculty graduate students and undergraduates work long hours for fast food wages Assessing the costs of higher education s corporatization on faculty and students at every level *How the University Works* is urgent reading for anyone interested in the fate of the university

Understanding Teaching Excellence in Higher Education Alan Skelton, 2005 What makes a university teacher excellent As debates rage about whether this is down to subject knowledge communication skills taking a research led

approach or being a technological whiz this book provides the first in depth examination of teaching excellence in higher education Identifying and examining interpretations of teaching excellence it considers what excellent means and implies for practice *Hidden Academics* Indhu Rajagopal,2002-01-01 Rajagopal examines the multiple ways contract faculty have emerged as an underclass in academia with differences in status compensation career opportunities and professional development **Career Movies** Jack Boozer,2010-01-01 Achieving the American Dream became inextricably linked with career business success after World War II as an increasingly consumerist America learned to define the dream through possessions and status Not surprisingly Hollywood films in the postwar years reflected the country s preoccupation with work and career success offering both dramatic and comedic visions of the career quest and its effects on personal fulfillment family relations women s roles and the creation or destruction of just and caring communities In this book Jack Boozer argues that the career business film achieved such variety and prominence in the years between 1945 and 2001 that it should be considered a legitimate film genre Analyzing numerous well known films from the entire period he defines the genre as one in which a protagonist strives for career success that often proves to be either elusive despite hard work or unfulfilling despite material rewards and status Boozer also explores several distinct subgenres of the career movie the corporate executive films of the 1950s the career struggles of single married and or parenting women the entrepreneurial film as it is also embodied in texts about immigrants and racial and ethnic minorities and business oriented femmes fatales the explosion of promotionism and the corporatization of employment and finally the blurring of work and private life in the brave new world of the televirtuality film *Learning Places* Masao Miyoshi,Harry Harootunian,2002-11-15 Examines the institutions and productions of area studies and explores what it takes to learn a place **Nice Work If You Can Get It** Andrew Ross,2009-04-01 2009 Choice Outstanding Academic Title A survey into an emerging pattern of labor instability and uneven global development Is job insecurity the new norm With fewer and fewer people working in steady long term positions for one employer has the dream of a secure job with full benefits and a decent salary become just that a dream In *Nice Work If You Can Get It* Andrew Ross surveys the new topography of the global workplace and finds an emerging pattern of labor instability and uneven development on a massive scale Combining detailed case studies with lucid analysis and graphic prose he looks at what the new landscape of contingent employment means for workers across national class and racial lines from the emerging creative class of high wage professionals to the multitudes of temporary migrant or low wage workers Developing the idea of precarious livelihoods to describe this new world of work and life Ross explores what it means in developed nations comparing the creative industry policies of the United States United Kingdom and European Union as well as developing countries by examining the quickfire transformation of China s labor market He also responds to the challenge of sustainability assessing the promise of green jobs through restorative alliances between labor advocates and environmentalists Ross argues that regardless of one s views on labor rights globalization and quality of life this new

precarious and indefinite life and the pitfalls and opportunities that accompany it is likely here to stay and must be addressed in a systematic way A more equitable kind of knowledge society emerges in these pages less skewed toward flexploitation and the speculative beneficiaries of intellectual property and more in tune with ideals and practices that are fair just and renewable
