Stanley Naribo Ngoa, Farooq A. Kperogi, Eghosa E. Osaghae, 2024-10-14 This book is a collection of scholarly essays from some of Nigeria's most notable social science scholars on the character contours and peculiarities of democratic practices in Nigeria's fourth

attempt at constitutional rule after years of brutally absolutist military regimes The Fourth Republic began in 1999 and continues to this day It is coterminous with the restoration of constitutional rule after 16 years of sustained military rule which represents the longest stretch of democratic self rule since Nigeria won independence from British colonialism in 1960 The chapters in this book contain scholarly insights into the pitfalls of governance institutional dysfunctions and foundational woes that continue to threaten the vitality of the Fourth Republic Contributors to the book offer critical theoretical lenses to gaze at the decline in democratic citizenship weakening of faith in the promises of democracy loss of critical media engagement with the state and deterioration of the socio political fortunes of the state in Nigeria **Improving Poor**

**People** Michael B. Katz, 1997-04-02 There are places where history feels irrelevant and America's inner cities are among them acknowledges Michael Katz in expressing the tensions between activism and scholarship But this major historian of urban poverty realizes that the pain in these cities has its origins in the American past To understand contemporary poverty he looks particularly at an old attitude because many nineteenth century reformers traced extreme poverty to drink laziness and other forms of bad behavior they tried to use public policy and philanthropy to improve the character of poor people rather than to attack the structural causes of their misery Showing how this misdiagnosis has afflicted today's welfare and educational systems Katz draws on his own experiences to introduce each of four topics the welfare state the underclass debate urban school reform and the strategies of survival used by the urban poor Uniquely informed by his personal involvement each chapter also illustrates the interpretive power of history by focusing on a strand of social policy in the nineteenth and twentieth centuries social welfare from the poorhouse era through the New Deal ideas about urban poverty from the undeserving poor to the underclass and the emergence of public education through the radical school reform movement now at work in Chicago Why have American governments proved unable to redesign a welfare system that will satisfy anyone Why has public policy proved unable to eradicate poverty and prevent the deterioration of major cities What strategies have helped poor people survive the poverty endemic to urban history How did urban schools become unresponsive bureaucracies that fail to educate most of their students Are there fresh constructive ways to think about welfare poverty and public education Throughout the book Katz shows how interpretations of the past grounded in analytic history can free us of comforting myths and help us to reframe discussions of these great public issues **Evaluation**

**Studies Review Annual**, 1978-09-01 **Embodying the Social** Esther Saraga, 2005-08-17 This book opens the series with a consideration of the social construction of social difference Taking the body as the point of departure it deals with the processes through which social problems and social inequalities are constructed In particular it examines the shifting ways in which our ideas about issues such as disability race and ethnicity and sexuality influence the development of social policies

**Scaling Urban Environmental Challenges** Peter J Marcotullio, Gordon McGranahan, 2012-06-25 Think globally act locally emphasizes the importance of scale in dealing with environmental challenges but not how to factor it in This major

new book focuses on the spatial dimensions of urban environmental burdens showing how important it is to take these into account when pursuing environmental justice and good governance whether in the context of the sanitary risks of slum living the pollution of uncontrolled industrialization and motorization or the enormous ecological footprints of affluent urban lifestyles Written by leading experts in the fields of urban development and environmental planning the book reviews the urban environmental shifts that have shaped today's challenges and examines conditions and problems in the urban centres of low middle and high income countries Case studies address such economically diverse cities as Accra New Delhi Mexico City and Manchester while thematic chapters explore issues including water sanitation and transportation The book concludes by exploring and analysing different scales of governance The editors argue that we should not rely solely on local governance to address local burdens like poor sanitation nor depend only on global governance for global challenges such as greenhouse gas emissions but that scale is crucial in both understanding the problems and devising successful responses
