Challenge Response A Study Of Famines:

Famine John R.K. Robson,2023-03-31 In *Famine 1981* a collection of essays by experts from the developing world and advanced agricultural societies the authors share their ecological perspectives and provide an insight into the multiple causes of famine They examine the fact that the main cause of famine is more likely to be as a result of human actions rather than the vagaries of climate and look at whether planned intervention by governments and relief agencies may compound the problems already existing **Famines During the 'Little Ice Age' (1300-1800)** Dominik Collet,Maximilian

Schuh,2017-08-01 This highly interdisciplinary book studies historical famines as an interface of nature and culture It will bring together researchers from the natural and social sciences as well as the humanities With reference to recent interdisciplinary concepts disaster studies vulnerability studies environmental history it will examine how the dominant opposition of natural and cultural factors can be overcome Such an integrated approach includes the archives of nature as well as archives of man It challenges deterministic models of human environment interaction and replaces them with a dynamic historicising approach As a result it provides a fresh perspective on the entanglement of climate and culture in past societies *A Comparative Study of Political and Bureaucratic Aspects of Emergency Famine Relief* Janice Westcott,1988

Famine-risk and Famine Prevention in the Modern World United Nations Research Institute for Social Development,1996 *Famine Prevention in India* Jean Drèze,1988 **The Indian Journal of Public Administration** ,1975 *The Political Economy of Hunger: Volume 2: Famine Prevention* Jean Drèze,Amartya Sen,1990 Part of a major report on world hunger instigated by the World Institute for Development Economics Research this volume deals with possible solutions to the problem of regular outbreaks of famine in various parts of the world *Famine in Peasant Societies* Ronald E. Seavoy,1986-06-24 In this controversial study Seavoy offers a new approach to the problem of periodic peacetime famine based on the actual behavior of peasants He maintains that it is possible to increase per capita food production without massive and inappropriate technological inputs Seavoy shifts the focus from modern development economics to a cultural and historical analysis of subsistence agriculture in Western Europe England and Ireland Indonesia and India From his survey of peasant civilization practices in these countries he generalizes on the social values that create what he terms the subsistence compromise In all of the ages and culture Seavoy finds a consistent social organization of agriculture that produces identical results seasonal hunger in poor crop years and famine conditions in consecutive poor crop years He argues that economic policies have failed to increase per capita food production because economists and government planners try to apply market oriented policies to populations that are not commercially motivated Once they understand the subsistence compromise policy makers can take appropriate political action **The New Famines** Stephen Devereux,2006-11-22 The recent occurrences of famine in Ethiopia and Southern Africa have propelled this key issue back into the public arena for the first time since 1984 as once again it becomes a priority not only for lesser developed countries

but also for the international community Exploring the paradox that is the persistence of famine in the contemporary world this book looks at the way the nature of famine is changing in the face of globalization and shifting geo political forces The book challenges perceived wisdom about the causes of famine and analyzes the worst cases of recent years including close analysis of food scarcity in North Korea Ethiopia Sudan and Malawi and less well known cases in Madagascar Iraq and Bosnia With fresh conceptual frameworks and analytical tools major theoretical constructs which have previously been applied to analyze famines such as the democracy ends famine argument Sen s entitlement approach and the complex political emergency framework are confronted This volume assembles an international team of contributors including Marcus Noland Alex de Waal and Dan Maxwell an impressive roster which helps make this book an important resource for those in the fields of development studies and political economics
