Ladislau Dowbor, 2025-09-12 To understand what is happening with our economies and our societies we need to consider how the different dimensions interact The economic political social cultural and environmental approaches must be brought together for us to see an overall direction and pace of change Institutions change very slowly but technology is moving at great speed and this holistic approach makes the overall drama clear by detailing the different factors of change and stressing the interactions This research will be useful for all the readers or researchers interested in understanding the systemic change we are facing The systemic challenges result from a number of smaller modifications in how our society works involving economic social political and cultural change We face sustainability issues massive inequality financialization technological trends demographic challenges and violent conflicts These transformations have in turn led to a growing political chaos both within countries and on the global scale This means that we are not only facing vital issues of our survival as humanity but losing our already fragile capacity of intervention The issue is not so much with the emergence of populist demagogues there will always be plenty of them but of the forces that have been using them and brought them to power Governance capacity is lagging stalled in rigid profit maximizing corporate interests and the unending political wrangles **Indonesia Matters: Asia's Emerging Democratic Power** Amitav Acharya, 2014-08-01 Indonesia is the fourth most populous country in the world after China India and the United States It is also the world's largest Muslim majority country and the third largest democracy Its economy is currently the 10th largest on the global scale Indonesia is recognized as an emerging power and a respected member of the international community It plays an important role not only in the Asia Pacific region but also in the world at large Indonesia has defied the grim predictions about its imminent collapse following the ouster of Suharto in 1998 Its ability to rebuild and reinvigorate itself into its current status is one of the most impressive stories of the late 20th and early 21st century Its journey since the fall of Suharto is inspiring at a time when the world has seen many failing nations recurring economic crises and growing radicalism and terrorism Yet the Indonesian story receives far less attention than the BRICS Brazil Russia India China and South Africa The Indonesian story suggests a different pathway to emerging power status This pathway is based not so much on military or economic resources Rather it lies in the ability of a country to develop a positive virtuous correlation among three factors democracy development and stability while pursuing a foreign policy of restraint towards neighbours and active engagement with the world at large This is the key lesson from the story of Indonesia that this book seeks to present It analyses Indonesia's foreign policy and international role under the democratic regime with particular focus on its role as a leader of ASEAN its relationship with the major powers of the Asia Pacific and its place in the global order of the 21st century
