McEvoy,2006-04-11 of UB s medical school that UB developed its School of Arts and Sciences and thus assumed its place among the other institutions of higher education Had Fillmore lived throughout UB s first seventy years he would probably have been elated by the success of his university and he should have been satisfied and pleased that UB remained intrinsically bonded to its community while at the same time engrafting the values and standards important to higher education s mission in the region UB and its medical school have undergone many challenging transitions since 1846 Included among them were 1 the completion of an academic campus in the far northeast corner of the City of Buffalo while leaving its medical dental and law schools firmly situated in the core of downtown Buffalo 2 the eventual relocation after the second world war of the law school to the newer campus in Amherst and the medical and dental school to the original academic campus and 3 the merger with the State University of New York System in 1962 Despite these significant transitions any one of which could have changed the intrinsic integrity of UB and disrupted the bonding between community and university that did not happen To this day the ties between community and academe persist Fillmore and White should celebrate their success and important contribution to Buffalo and Western New York **Quality of sexual and reproductive health care: strengths, gaps, and challenges for midwifery care**

Ramon Escuriet,Lorena Binfa , Loreto Pantoja,2025-02-18 Poor quality of sexual and reproductive care SRC persists despite countries commitments to international conferences The challenges posed by the COVID 19 pandemic reversed trends in maternal and neonatal mortality and contraception rates increasing unmet family planning needs and gender based violence Evidence shows that midwifery care has made an essential contribution to the development of high quality services in maternal and childcare The introduction of midwifery professionals trained according to international standards and integrated into the health system can provide around 90% of primary health care for women and newborns including family planning These skilled professionals can save lives and improve the health and well being of women and newborn infants at a scale unmatched by other health interventions Evidence identified 56 outcomes improved by the full scope of midwifery The weight of sexual and reproductive health on general health and wellbeing has a greater impact on women particularly those that are neglected to receive high quality SRC Providing high quality SRC demands more humanized and integrated efficient and effective services with a greater emphasis on quality both from a technical perspective and from the user experience Despite all the efforts the quality of SRC is still a challenge globally research is needed to identify best practices addressing quality care tailored to individuals implementation of models of care that enhance both well being and safety optimization of physiological processes during childbirth as well as validation of outcomes measures **Africa's Health Challenges** Andrew F. Cooper,John J.
