Challenging Women Erica Burman, 1996 Drawing upon current feminist research and theory this book explores key professional issues in psychology and its related disciplines Topics covered include sexual abuse menstruation feminist therapy the regulation of mothering women's safety and the gendering of the caring professions New Feminist Stories of Child Sexual Abuse Paula Reavey, Sam Warner, 2003 Child sexual abuse is a multifaceted event interpreted in many different ways in many different contexts In New Feminist Stories of Child Sexual Abuse contributors try to untangle some of the complex ways in which stories of child sexual abuse are translated through and into personal professional and social politics The first section of the book explores the cultural and political landscape of child sexual abuse in Western and non Western contexts It examines the ways in which radical aspects of feminism can be undermined in Western cultures and how Westernised ideologies of childhood sex and gender have been used to structure discussions about child sexual abuse across the world The second section traces the effects of these wider cultural and political narratives through the various contexts in which child sexual abuse is theorised and around which interventions in the lives of women are structured It provides insights into how traditional approaches to understanding harm can be challenged and reworked in practice using alternative therapeutic models based on feminist post structuralist agendas Reworking earlier feminist analyses New Feminist Stories of Child Sexual Abuse asks pertinent questions about how child sexual abuse is produced rather than merely represented in the ways we speak about it **A Feminist Companion to Research Methods in Psychology** Hannah Frith, Rose Capdevila, 2022-10-18 If you are interested in lived experience and meaning making or want to think more creatively about psychology this text is utterly invaluable Paula Reavey Professor of Psychology and Mental Health London South Bank University UK This book provides a wonderful gently provocative critical companion to the standard psychological curriculum Professor Virginia Braun School of Psychology Waipapa Taumata Rau The University of Auckland NZ This is essential reading for all undergraduate and applied psychology courses Professor Erica Burman University of Manchester UK editor of Feminists and Psychological Practice and co author of Challenging women psychology's exclusions feminist possibilities The Feminist Companion series includes books which act as your friends and mentors in book form supporting you in your studies especially when things get tough This companion offers a better informed understanding of research methods exploring key topics such as ethics reproducibility reliability and validity and research design through a feminist lens The ethics of research relationships are explored alongside issues to do with prejudices and biases implicated in psychology's treatment of women Ultimately this book aims to develop your critical and analytical skills by encouraging a questioning approach to understanding how psychological knowledge is produced and by offering alternative feminist informed approaches to framing research questions adopting data collection techniques and analysing and interpreting data Key features of this book include Five Reasons Why You Need a Feminist Companion a helpful guide to what readers can expect to gain from this book Activity
