**Chance Vought F4u Corsair** Maciej Noszczak,2019-04-19 The enormous war demand for all kinds of armaments including fighters caused the Vought factory to be overloaded with production Therefore it was extended to Brewster and Goodyear factories where the production of F4U fighters began Ultimately 12 500 Corsairs were built in 16 different variants The first production version of the Corsair F4U 1 had a characteristic built in fairing cabin so called birdcage which also forced to lower the position of the pilot s seat There were many visible changes compared to the XF4U 1 prototype First of all the cockpit was moved 81 cm to the rear due to the installation of a much larger fuel tank in front of the cabin The whole fuselage was then extended by 43 cm Cockpit armor and a bulletproof windshield were also used To improve visibility from the cabin a windows behind the pilot s headboard were added on both sides The F4U 1 version was powered by the Pratt Whitney R 2800 8 twin wasp engine Another variant was the F4U 1A in which more or less from mid to the end of the production a higher and wider canopies were used very similar to the British Malcolm hood The pilot s seat was raised by 18 cm which in addition with a new canopy and lengthening the tailwheel leg by 15 cm improved the visibility from the cockpit over the enormous nose of the machine An important improvement was the introduction of much better oil shock absorbers on the main undercarriage which eliminated the problem of kangaroos during landings This had a considerable impact on Corsair service on board of aircraft carriers

**The Vought F4U Corsair in The War Against Japan** Tim Hillier-Graves,2025-11-25 By mid 1944 the Allies especially the United States began preparing for a potential invasion of Japan Churchill expected the Royal Navy to support the U S Navy in achieving aerial dominance The Admiralty focused on strengthening its carrier forces forming the 15th Naval Fighter Wing However a key question arose which aircraft would the Wing use The Supermarine Seafire lacked the necessary range and endurance for Pacific operations while Hellcats were in short supply and prioritized for U S use This left the Vought F4U Corsair as the best option Although initially dismissed due to its poor safety record on carriers the Corsair was transferred to the Royal Navy s Fleet Air Arm relieving American forces of the controversial aircraft The 15th Naval Fighter Wing made up of Nos 1830 1831 and 1833 squadrons became the first to deploy the Corsair at sea Despite early losses British and Commonwealth pilots demonstrated its effectiveness eventually convincing even the skeptical U S Navy of its capabilities The Corsair proved to be one of the war s most effective fighters Led by Battle of Britain ace Dickie Cork until his death in 1944 the Wing achieved notable successes against Japanese forces aboard HMS Illustrious Drawing on accounts from 20 veterans and extensive archives this book highlights the Corsair s transformation into a legendary naval fighter and the pilots indomitable spirit
