Change In The Weather Climate And Culture In Australia:

A Change in the Weather Tim Sherratt, Tom Griffiths, Libby Robin, 2005 Climate plays a considerable role in the society and culture of Australia This text is an interdisciplinary weather report that draws together perspectives from the social sciences the humanities science and engineering to deepen our understanding of the relationship between climate and culture in Australia

Anthropology and Climate Change Susan A Crate, Mark Nuttall, 2016-06-03 Comprehensively assessing anthropology's engagement with climate change this volume both maps out exciting trajectories for research and issues a call to action Linking sophisticated knowledge to effective actions Anthropology and Climate Change is essential for students and scholars in anthropology and environmental studies

Climate Change and Anthropos Linda Connor, 2016-02-05 Anthropos in the sense of species as well as cultures and ethics locates humans as part of much larger orders of existence fundamental when thinking about climate change This book offers a new way of exploring the significance of locality and lives in the epoch of the Anthropocene a time when humans confront the limits of our control over nature Many scholars now write about the ethics policies and politics of climate change focussing on global processes and effects The book's innovative approach to cross cultural comparison and a regionally based study explores people's experiences of environmental change and the meaning of climate change for diverse human worlds in a changing biosphere The main study site is the Hunter Valley in southeast Australia an ecological region defined by the Hunter River catchment a dwelling place for many generations of people and a key location for transnational corporations focussed on the mining burning and export of black coal Abundant fossil fuel reserves tie Hunter people and places to the Asia Pacific the engine room of global economic growth in the twenty first century and the largest user of the planet's natural resources The book analyses the nexus of place and perceptions political economy and social organisation in situations where environmental changes are radically transforming collective worlds Based on an anthropological approach informed by other ways of thinking about environment people relationships this book analyses the social and cultural dimensions of climate change holistically Each chapter links the large scales of species and planet with small places commodity chains local actions myths and values as well as the mingled strands of dystopian imaginings and strivings for recuperative renewal in an era of transition

A Cultural History of Climate Change Tom Bristow, Thomas H. Ford, 2016-04-20 Charting innovative directions in the environmental humanities this book examines the cultural history of climate change under three broad headings history writing and politics Climate change compels us to rethink many of our traditional means of historical understanding and demands new ways of relating human knowledge action and representations to the dimensions of geological and evolutionary time To address these challenges this book positions our present moment of climatic knowledge within much longer histories of climatic experience Only in light of these histories it argues can we properly understand what climate means today across an array of discursive domains from politics literature and law to neighbourly conversation Its chapters identify turning

points and experiments in the construction of climates and of atmospheres of sensation They examine how contemporary ecological thought has repoliticised the representation of nature and detail vital aspects of the history and prehistory of our climatic modernity This ground breaking text will be of great interest to researchers and postgraduate students in environmental history environmental governance history of ideas and science literature and eco criticism political theory cultural theory as well as all general readers interested in climate change

Exploring Climate Change through Science and in Society Mike Hulme, 2013-09-11 Mike Hulme has been studying climate change for over thirty years and is today one of the most distinctive and recognisable voices speaking internationally about climate change in the academy in public and in the media The argument that he has made powerfully over the last few years is that climate change has to be understood as much as an idea situated in different cultural contexts as it is as a physical phenomenon to be studied through universal scientific practices Climate change at its core embraces both science and society both knowledge and culture Hulme s numerous academic and popular writings have explored what this perspective means for the different ways climate change is studied narrated argued over and acted upon Exploring Climate Change through Science and in Society gathers together for the first time a collection of his most popular prominent and controversial articles essays speeches interviews and reviews dating back to the late 1980s The 50 or so short items are grouped together in seven themes Science Researching Culture Policy Communicating Controversy Futures and within each theme are arranged chronologically to reveal changing ideas evidence and perspectives about climate change Each themed section is preceded with a brief introduction drawing out the main issues examined Three substantive unpublished new essays have been specially written for the book including one reflecting on the legacy of Climategate Taken as a collection these writings reveal the changes in scientific and public understandings of climate change since the late 1980s as refracted through the mind and expression of one leading academic and public commentator The collection shows the many different ways in which it is necessary to approach the idea of climate change to interpret and make sense of the divergent and discordant voices proclaiming it in the public sphere

Disasters in Australia and New Zealand Scott McKinnon, Margaret Cook, 2020-07-07 Disasters in Australia and New Zealand brings together a collection of essays on the history of disasters in both countries Leading experts provide a timely interrogation of long held assumptions about the impacts of bushfires floods cyclones and earthquakes exploring the blurred line between nature and culture asking what are the anthropogenic causes of natural disasters How have disasters been remembered or forgotten And how have societies over generations responded to or understood disaster As climate change escalates disaster risk in Australia New Zealand and around the world these questions have assumed greater urgency This unique collection poses a challenge to learn from past experiences and to implement behavioural and policy change Rich in oral history and archival research Disasters in Australia and New Zealand offers practical and illuminating insights that will appeal to historians and disaster scholars across multiple disciplines

[The Routledge Handbook of Planning for Health](#)

and Well-Being Hugh Barton, Susan Thompson, Sarah Burgess, Marcus Grant, 2015-05-22 Urban planning is deeply implicated in both the planetary crisis of climate change and the personal crises of unhealthy lifestyles Worldwide health issues such as obesity mental illness growing health inequalities and climate vulnerability cannot be solved solely by medicines but also by tackling the social economic and environmental determinants In a time when unhealthy and unsustainable conditions are being built into the physical fabric of cities a new awareness and strategy is urgently needed to putting health and well being at the heart of planning The Routledge Handbook of Planning for Health and Well being authoritatively and comprehensively integrates health into planning strengthening the hands of those who argue and plan for healthy environments With contributions from international leaders in the field the Handbook of Planning for Health and Well being provides context philosophy research processes and tools of experienced practitioners through case studies from four continents A *Companion to Global Environmental History* J. R. McNeill, Erin Stewart Mauldin, 2015-05-04 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil Germany and China Telling Environmental Histories Katie Holmes, Heather Goodall, 2017-12-12 This collection explores the intersections of oral history and environmental history Oral history offers environmental historians the opportunity to understand the ways people s perceptions experiences and beliefs about environments change over time In turn the insights of environmental history challenge oral historians to think more critically about the ways an active more than human world shapes experiences and people The integration of these approaches enables us to more fully and critically understand the ways cultural and individual memory and experience shapes human interactions with the more than human world just as it enables us to identify the ways human memory identity and experience is moulded by the landscapes and environments in which people live and labour It includes contributions from Australia India the UK Canada and the USA **Approaches to Language and Culture** Svenja Völkel, Nico Nassenstein, 2022-08-22 This book provides an overview of approaches to language and culture and it outlines the broad interdisciplinary field of anthropological linguistics and linguistic anthropology It identifies current and future directions of research including language socialization language reclamation speech styles and genres language ideology verbal taboo social indexicality emotion time and many more Furthermore it offers areal perspectives on the study of language in cultural contexts namely Africa the Americas Australia and Oceania Mainland Southeast Asia and Europe and it lays the foundation for future developments within the field In this way the book bridges the disciplines of cultural anthropology and linguistics

and paves the way for the new book series *Anthropological Linguistics* Climate and Culture Giuseppe Feola, Hilary Geoghegan, Alex Arnall, 2019-10-03 Discusses how culture both facilitates and inhibits our ability to address live with and make sense of climate change New Earth Histories Alison Bashford, Emily M. Kern, Adam Bobbette, 2023-11-06 A kaleidoscopic rethinking of how we come to know the earth This book brings the history of the geosciences and world cosmologies together exploring many traditions including Chinese Pacific Islamic South and Southeast Asian conceptions of the earth's origin and makeup Together the chapters ask How have different ideas about the sacred animate and earthly changed modern environmental sciences How have different world traditions understood human and geological origins How does the inclusion of multiple cosmologies change the meaning of the Anthropocene and the global climate crisis By carefully examining these questions *New Earth Histories* sets an ambitious agenda for how we think about the earth The chapters consider debates about the age and structure of the earth how humans and earth systems interact and how empire has been conceived in multiple traditions The methods the authors deploy are diverse from cultural history and visual and material studies to ethnography geography and Indigenous studies and the effect is to highlight how earth knowledge emerged from historically specific situations *New Earth Histories* provides both a framework for studying science at a global scale and fascinating examples to educate as well as inspire future work Essential reading for students and scholars of earth science history environmental humanities history of science and religion and science and empire **From Disaster Response to Risk Management** Linda C. Botterill, Donald A. Wilhite, 2005-02-17 An academically focused collection of papers highlighting the successes and challenges of a move from disaster to risk management in responding to drought The book passes on the experiences gained from Australia's trail blazing new policy introduced in 1992 **Health of People, Places and Planet** Colin D. Butler, Jane Dixon, Anthony G. Capon, 2015-07-31 This book has three main goals The first is to celebrate the work of a great public health figure the late A J Tony McMichael 1942 2014 The second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment human institutions and behaviours a broad approach championed by Tony The third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health from a foundation of objective scholarship The book's foreword and 38 chapters were written by people who were inspired by Tony many of whom worked with him at some point in the last 40 years Its structure reflects five major public health domains each of which Tony made major contributions to in an extremely productive academic life occupational health and safety environmental and social epidemiology nutrition and food systems climate change and health and ecosystem change and infectious disease The final section Transformation is dedicated to Tony's desire for public health scientists to propose adaptive and mitigating solutions to the problems they were observing Each section contains at least one key publication involving Tony There is also a selection of artworks from an exhibition which formed part of the conference held to honour Tony at The Australian

National University in 2012 This conference formed the first part of Tony's festschrift completed by this book *Aboriginal Peoples and Birds in Australia* Philip A. Clarke, 2023-04-03 Australia is home to many distinctive species of birds and Aboriginal peoples have developed close alliances with them over the millennia of their custodianship of this country *Aboriginal Peoples and Birds in Australia: Historical and Cultural Relationships* provides a review of the broad physical historical and cultural relationships that Aboriginal people have had with the Australian avifauna This book aims to raise awareness of the alternative bodies of ornithological knowledge that reside outside of Western science It describes the role of birds as totemic ancestors and spirit beings and explores Aboriginal bird nomenclature foraging techniques and the use of avian materials to make food medicine and artefacts Through a historical perspective this book examines the gaps between knowledge systems of Indigenous peoples and Western science to encourage greater collaboration and acknowledgment in the future Cultural sensitivity Readers are warned that there may be words descriptions and terms used in this book that are culturally sensitive and which might not normally be used in certain public or community contexts While this information may not reflect current understanding it is provided by the author in a historical context This publication may also contain quotations terms and annotations that reflect the historical attitude of the original author or that of the period in which the item was written and may be considered inappropriate today Aboriginal and Torres Strait Islander peoples are advised that this publication may contain the names and images of people who have passed away Current Trends in Human Ecology Alpina Begossi, Priscila Lopes, 2009-01-14 An exercise of interdisciplinarity at the crossroads of humans and the environment this could be one definition of human ecology as it is demonstrated within this book Examples of different branches of human ecology are shown as feasible alternatives to understand the interactions of human culture and behaviour with the natural environment from all parts of the world Current trends ranging from climate change to ecological knowledge and environmental co management are deeply exploited using a diversified array of empirical case studies Theoretical aspects are included and examined in every case including the evolution of culture values and webs of information within cultures The central theme approaches and reveals the social cultural economic and ecological processes which link human beings to their environment From a mixture of practice and theory we emerge with alternatives to mitigate and prevent the accelerating negative changes currently witnessed on our planet where increasingly fewer people are safe More importantly this book provides examples showing how those whose lives are deeply rooted on a direct natural resource dependency are the first to be affected by the global trend of environmental degradation Small scale fishers farmers and herders from the tropics and from cold regions have their livelihood affected by global changes regional politics and cultural exchanges Whether and how they will survive adapt or embody such changes is not known and this is one more reason to include and involve local groups when searching for sustainable solutions In a changing world exploring current threats and impacts of human actions on the environment is a necessity but bringing about alternatives some of them already part of traditional

human practices is urgent and can turn to be a promising solution Anthropology sociology and ecology come together in this book where the unifying goal of theorizing and practising interdisciplinarity in human ecology is shown by closely tracking examples of current trends and developments This book is a harvest from the XV International Meeting of the Society for Human Ecology engaging over 200 people from 27 countries from all continents held in Rio de Janeiro Brazil October 4 7 2007 organized by A Begossi and P Lopes with the support of the Fisheries and Food Institute FIFO and the State University of Campinas UNICAMP This volume ends by indicating several lines of thought and of analyses on current subjects as follows sustainability in different cultural contexts and perspectives methods towards approaching sustainable systems and current global concerns Those include agriculture in tropical areas slash and burn practices climate change and nature and human behavioural patterns among others
