Autonomy David Eden, 2016-04-08 Autonomy Capital Class and Politics explores and critiques one of the most dynamic terrains of political theory sometimes referred to as Autonomist Marxism or post Operaismo This theory shot to prominence with the publication of *Empire* by Hardt and Negri and has been associated with cutting edge developments in political and cultural practice yet there exists no work that critically examines it in its contemporary breadth Taking three divergent manifestations of Autonomist Marxism found in the works of Antonio Negri and Paulo Virno the Midnight Notes Collective and John Holloway David Eden examines how each approach questions the nature of class and contemporary capitalism and how they extrapolate politics Not only is such juxtaposition both fruitful and unprecedented but Eden then constructs critiques of each approach and draws out deeper common concerns Suggesting a novel rethinking of emancipatory praxis this book provides a much needed insight into the current tensions and clashes within society and politics

Handbook of Revolutions in the 21st Century Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new

wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

The Political Thought of John Holloway Alfonso García Vela, Alberto Bonnet, 2023-08-16 This book provides renewed reflection and critical discussion on John Holloway s political and theoretical thought Two decades ago in *Change the World without Taking Power* Holloway set out on a path that he followed a decade later in *Crack Capitalism* and continues to walk today with his new book *Hope in Hopeless Times* The contributions in this volume critically analyze his innovative attempt to rethink the meaning and dynamics of revolution in the conditions of contemporary capitalism More than ten years after the publication of *Crack Capitalism* this volume aims to question Holloway s attempt as well as his theoretical foundations in his original rereading of Marxism and Critical Theory and their relations with the characteristics adopted by the anti capitalist struggles during the last two decades Its authors from different geographies traditions and scientific disciplines establish throughout its pages a fruitful dialogue convened by Holloway s innovative ideas

Humanity and Uncontrollability Simon Susen, 2024-08-14 Focusing on the work of Hartmut Rosa this book provides an in depth account of the extent to which we as humans are obliged to face up to the uncontrollability of the world Rosa is widely regarded as one of the most original contemporary European social theorists Along with the concepts of acceleration alienation and resonance the notion of uncontrollability *Unverfügbarkeit* ranks among the most important reference points in Rosa s critical theory especially in his recent work It is no accident then that following his extensive inquiries into acceleration and alienation and the publication of his magnum opus on resonance Rosa has found it necessary to offer a brief but powerful account of the place occupied by the concept of uncontrollability in his critical theory The first half of this book comprises a

detailed outline of Rosa's central arguments on uncontrollability before moving in the second half to a thorough assessment of the most significant limitations of his approach. This book will appeal to students and scholars of the social sciences and humanities particularly to those interested in social theory, social philosophy and the history of ideas. **Power and Transnational Activism** Thomas Olesen, 2010-12-03 Offering new and critical insights on global activism and power it features case studies on China and Tibet HIV AIDS climate change child labour the WTO women and the UN the global public sphere world social forums and global civil society. **The Marx of Communism** Alexandros Chrysis, 2022-06-30 Following Marx's own itinerary from Paris to London from politics to the critique of political economy *The Marx of Communism* delves into a creatively unfolding international debate on the democracy/communism relation while supporting a 21st century communism as a social alternative to capitalism. Taking into consideration Marx's analysis of communism both as a movement and a social formation this study focuses on the dialectics of transition from capitalism to communism. Dealing with communism as the outcome of a long term cultural and political process the author defends Marxian communism as the open ended constitution of a self governed demos whose citizens create their own way of life on the ground of a stateless and classless society. From this point of view the end of the state does not mean the end but the revival of politics in terms of a communist bios. Reshaping their collective and personal values and setting limits to the production technology dynamics of their economy this book argues the citizens of a communist polis form a promising antithesis to the private individuals of a capitalist society. **Change the World Without Taking Power** John Holloway, 2002-03-20 Offers a radical rethinking of Marx's concept of revolution that shows how we can bring about social and political change today. [The Palgrave Handbook of Social Movements, Revolution, and Social Transformation](#) Berch Berberoglu, 2018-09-26 This handbook on social movements, revolution and social transformation analyzes people's struggles to bring about social change in the age of globalization. It examines the origins, nature, dynamics and challenges of such movements as they aim to change dominant social, economic and political institutions and structures across the globe. Departing from a theoretical introduction that explores major classical and contemporary theories of social movements and transformation the contributions collected here use a class based approach to examine key cases of social movements, rebellions and revolutions worldwide from the turn of the twentieth to the early twenty first centuries. Against this wide ranging background the handbook concludes by charting the varied and competing future developments and trajectories of social movements, revolutions and social transformations. *Contesting Economic and Social Rights in Ireland* Thomas Murray, Thomas Patrick Murray, 2016-08-18 A comparative analysis from below of attempts to constitutionalise socio economic rights in Ireland from 1848 rebellions to present day protests. **Changing Venezuela by Taking Power** Gregory Wilpert, 2020-05-05 Since coming to power in 1998 the Chavez government has inspired both fierce internal debate and horror amongst Western governments accustomed to counting on an obsequious regime in the oil rich state. In this rich and resourceful study Greg Wilpert exposes the self serving

logic behind much middle class opposition to Venezuela's elected leader and explains the real reason for their alarm. He argues that the Chavez government has instituted one of the world's most progressive constitutions but warns that they have yet to overcome the dangerous specters of the country's past.

Sociology in the Twenty-First Century Simon

Susen, 2020-10-17 This book examines key trends, debates, and challenges in twenty-first century sociology. To this end, it focuses on significant issues surrounding the nature of sociology: What is sociology? the history of sociology. How has sociology evolved and the study of sociology? How can or should we make sense of sociology? These issues have been and will continue to be essential to the creation of conceptually informed, methodologically rigorous, and empirically substantiated research programmes in the discipline. Over the past years, however, there have been numerous disputes and controversies concerning the future of sociology. Particularly important in this respect are recent and ongoing discussions on the possibilities of developing new and arguably post-classical forms of sociology. The central assumption underlying most of these projects is the contention that a comprehensive analysis of the principal challenges faced by global society requires the construction of a sociology capable of accounting for the interconnectedness of social actors and social structures across time and space. This book provides a cutting-edge overview of crucial past, present, and possible future trends, debates, and challenges shaping the pursuit of sociological inquiry. Simon Susen, one of the most knowledgeable scholars in the contemporary social sciences, examines the key challenges with which sociology is confronted today. This book is a must-read for professional sociologists as well as for those studying the subject. Luc Boltanski, cole des Hautes études en Sciences Sociales, Paris, France. Simon Susen provides a balanced update on sociology's theoretical, methodological, and institutional resources as well as challenges in today's complicated local and global social worlds. Fortunately, he has innovative and practical recommendations for ensuring the cutting-edge relevance of sociological thinking. This book is an excellent choice for undergraduate and postgraduate students as well as for the general reader. Sandra Harding, University of California, Los Angeles, USA. A comprehensive and judicious account of the intellectual and material state of sociology based on omnivorous reading and incisive analysis. The writing is beautifully clear, and the book is a major contribution to the self-understanding of the discipline. William Outhwaite, Newcastle University, UK.

Critical research and theorizing on the Anti or Alter Globalization Movement has exploded over the last two decades. This volume provides a platform for scholar-activists themselves to share insights from engaged research and to critically reflect on movement histories and internal dynamics. It also highlights ways in which activists are reaching beyond their geographical and issue boundaries to link with others in struggle to construct a broader global movement of the left and beyond. Case studies span the social movement spectrum from more traditional concerns with class, the primacy of the labor movement, economic redistribution, and justice through the so-called new movements of identity and post-materialist issues of

peace the environment gender and indigenous struggles to the newest currents in post autonomy post anarchism and de or anti coloniality Together these studies show that what began in Chiapas with the Zapatista cry of basta ya as an anti globalization movement morphed for a time into alter globalization and global peace and justice and may now be emerging as a counter hegemonic project of and for global democratization This book was published as a special issue of Globalizations

Global Capitalism and the Crisis of Humanity William I. Robinson, 2014-07-28 This book discusses the nature of the new global capitalism the rise of a globalized production and financial system a transnational capitalist class and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis ridden and out of control

Failed Peacemaking Sandra Pogodda, Oliver P. Richmond, Gézim Visoka, 2023-07-10 This book investigates why peace and reform processes across the world have recently been stagnating or have become blocked They have failed to maintain security rights development and justice in the liberal international order The book identifies the related rise of counter peace processes at the heart of failed peacemaking efforts and explores the implications for an emerging multi polar order where local and international tools for peace and reform appear to be ineffective Across a range of recent cases from Cambodia the Balkans the Sahel region DRC Colombia Afghanistan and many others such dynamics are becoming clearer In particular small scale blocking tactics across different peace processes have been evolving into larger political strategies which are then disseminated within revisionist and revanchist international networks Ultimately this phenomenon has undermined liberal international order Spoilers and tactical blockages to peace have connected across local national regional and international scales highlighting ideological divisions Drawing on counter revolutionary theory the concept of counter peace is used as a tool to critically interrogate a systemic array of blockages to peace Distinct counter peace patterns are now entangled in peace and reform processes including the stalemate pattern the limited counter peace and the unmitigated counter peace patterns Across cases once tactical blockages begin to form these patterns they become systemic and ultimately enable conflict escalation Consequently the intimate entanglement of the existing international peace architecture with counter peace processes points to ideological divisions in international order as well as the growing gulf between diminished practices of peace and reform with critical scholarship on peace justice and sustainability

Environmental Anthropology Engaging Ecotopia Joshua Lockyer, James R. Veteto, 2013-04-01 In order to move global society towards a sustainable ecotopia solutions must be engaged in specific places and communities and the authors here argue for re orienting environmental anthropology from a problem oriented towards a solutions focused endeavor Using case studies from around the world the contributors scholar activists and activist practitioners examine the interrelationships between three prominent environmental social movements bioregionalism a worldview and political ecology that grounds environmental action and experience permaculture a design science for putting the bioregional vision into action and ecovillages the ever dynamic settings for creating sustainable local cultures

The Sociology of

Globalization Luke Martell, 2010-02-22 This accessible and wide ranging book demonstrates the distinctive insights that sociology has to bring to the study of globalization Taking in the cultural political and economic dimensions of globalization the book provides a thorough introduction to key debates and critically evaluates the causes and consequences of a globalizing world In addition to topics such as America s changing position in the world under President Obama the growth of China as a global power and anti globalization movements Martell brings to the discussion other aspects of world affairs that sociologists have sometimes not focused on so much In doing so he underlines the importance of economic motivations and structures and shows how power inequality and conflict are major factors in globalization The book argues that globalization offers many opportunities for greater interaction and participation in societies throughout the world for instance through the media and migration but also has dark sides such as war and nuclear proliferation global poverty climate change and financial crisis This book will be an ideal companion to students across the social sciences taking courses that cover globalization and the sociology of globalization in particular
