

Change of perspective in vocational education

Defining process understanding new - networking must be placed at the center of training

„Professionals need to think and optimize systems and their function from the processes and software.“ (Expert Workshop)

The software-technical networking with the associated CPS elements is continuously disseminated. As a result of an increasing diffusion of Industry 4.0, systems and machines must always be thought of and considered by

- networking,
- CP-systems,
- software and
- Process integration

This significantly changes the interaction between human and machine.

Change Through Networking In Vocational Education:

Change Through Networking in Vocational Education Tony Nasta,1993 *Resources in Education* ,2001

Social Network Theory and Educational Change Alan J. Daly,2010-12-01 Social Network Theory and Educational Change offers a provocative and fascinating exploration of how social networks in schools can impede or facilitate the work of education reform Drawing on the work of leading scholars the book comprises a series of studies examining networks among teachers and school leaders contrasting formal and informal organizational structures and exploring the mechanisms by which ideas information and influence flow from person to person and group to group The case studies provided in the book reflect a rich variety of approaches and methodologies showcasing the range and power of this dynamic new mode of analysis An introductory chapter places social network theory in context and explains the basic tools and concepts while a concluding chapter points toward new directions in the field Taken together they make a powerful statement that the success or failure of education reform ultimately is not solely the result of technical plans and blueprints but of the relational ties that support or constrain the pace depth and direction of change This unique volume provides an invaluable introduction to an emerging and increasingly important field of education research
