Donkey and the Boat Chris Wickham, 2023-03-16 A new account of the Mediterranean economy in the 10th to 12th centuries forcing readers to entirely rethink the underlying logic to medieval economic systems Chris Wickham re examines documentary and archaeological sources to give a detailed account of both individual economies and their relationships with each other Chris Wickham offers a new account of the Mediterranean economy in the tenth to twelfth centuries based on a completely new look at the sources documentary and archaeological Our knowledge of the Mediterranean economy is based on syntheses which are between 50 and 150 years old they are based on outdated assumptions and restricted data sets and were written before there was any usable archaeology and Wickham contends that they have to be properly rethought This is the first book ever to give a fully detailed comparative account of the regions of the Mediterranean in this period in their internal economies and in their relationships with each other It focusses on Egypt Tunisia Sicily the Byzantine empire Islamic Spain and Portugal and north central Italy and gives the first comprehensive account of the changing economies of each only Byzantium has a good prior synthesis It aims to force our rethinking of how economies worked in the medieval Mediterranean It also offers a rethinking of how we should understand the underlying logic of the medieval economy in general

Byzantinum in the Year 1000 Paul Magdalino, 2003 One thousand years ago the Byzantine Empire was reaching the height of its revival as a medieval state The ten contributions to this volume by scholars from six European countries reassess key aspects of the empire's politics and culture in the long reign of the emperor Basil II whose name has come to symbolise the greatness of Byzantium in the age before the crusades The first five chapters deal with international diplomacy the emperor's power and government in Asia Minor and the frontier provinces of the Balkans and southern Italy The second half of the volume covers aspects of law history writing poetry and hagiography and concludes with a discussion of Byzantine attitudes to the Millennium

Ethnography After Antiquity Anthony Kaldellis, 2013-08-12 Although Greek and Roman authors wrote ethnographic texts describing foreign cultures ethnography seems to disappear from Byzantine literature after the seventh century C E a perplexing exception for a culture so strongly self identified with the Roman empire Yet the Byzantines geographically located at the heart of the upheavals that led from the ancient to the modern world had abundant and sophisticated knowledge of the cultures with which they struggled and bargained *Ethnography After Antiquity* examines both the instances and omissions of Byzantine ethnography exploring the political and religious motivations for writing or not writing about other peoples Through the ethnographies embedded in classical histories military manuals Constantine VII's *De administrando imperio* and religious literature Anthony Kaldellis shows Byzantine authors using accounts of foreign cultures as vehicles to critique their own state or to demonstrate Romano Christian superiority over Islam He comes to the startling conclusion that the Byzantines did not view cultural differences through a purely theological prism their Roman identity rather than their orthodoxy was the vital distinction from cultures they considered heretic and barbarian Filling in the previously unexplained gap between antiquity and the resurgence of ethnography in the late Byzantine period

Ethnography After Antiquity offers new perspective on how Byzantium positioned itself with and against the dramatically shifting world

Brother-making in Late Antiquity and Byzantium Claudia Rapp,2016 Among medieval Christian societies Byzantium is unique in preserving an ecclesiastical ritual of adelphopoiesis which pronounces two men not related by birth as brothers for life It has its origin as a spiritual blessing in the monastic world of late antiquity and it becomes a popular social networking strategy among lay people from the ninth century onwards even finding application in recent times Located at the intersection of religion and society brother making exemplifies how social practice can become ritualized and subsequently subjected to attempts of ecclesiastical and legal control Controversially adelphopoiesis was at the center of a modern debate about the existence of same sex unions in medieval Europe This book the first ever comprehensive history of this unique feature of Byzantine life argues persuasively that the ecclesiastical ritual to bless a relationship between two men bears no resemblance to marriage Wide ranging in its use of sources from a complete census of the manuscripts containing the ritual of adelphopoiesis to the literature and archaeology of early monasticism and from the works of hagiographers historiographers and legal experts in Byzantium to comparative material in the Latin West and the Slavic world Brother Making in Late Antiquity and Byzantium examines the fascinating religious and social features of the ritual shedding light on little known aspects of Byzantine society
