Changing Orders The Evolution Of The Worlds Armies 1945 To The Present:

Changing Orders Peter Tsouras,1994 Surveys the development of modern military weapons strategies and tactics

MILITARY UNIFORMS IN EUROPE 1900 - 2000 Volume Two R Spencer Kidd,2013-10-01 This book Volume Two gives an historical overview of 51 countries whose armed forces served in Europe 1900 2000 together with uniform descriptions Includes 204 full colour paintings of the regular armies marines airforce and para military troops engaged in land exercises operations and warfare in Europe including non European troops serving in Europe Each entry is accompanied by a history and description of the uniforms illustrated The author and illustrator Ron Kidd has been interested in both police and military history uniforms and insignia since he was a school boy in the 1950 s He has visited over 300 police and military museums world wide and has written and illustrated a number of magazine articles on both police and military history and uniforms He is a member of both the Military Heraldry Society and the Military Historical Society

The Transition to National Armies in the Former Soviet Republics, 1988-2005 Jesse Paul Lehrke,2013-01-03 This book looks at the militaries of the late Soviet and post Soviet republics Beginning with the end of the Soviet era it recognises that the successor states did not spring from nowhere but inherited a legacy that influenced all that followed The book discusses how politicians control the instruments that are the manifestation of the state s monopoly on violence and how society views and supports the military By taking a bottom up empirical approach that examines the personnel leaders organisations and institutions and their outlook and attitudes the book presents a comprehensive picture of the armed forces showing how the armed forces are very significantly shaped by the surrounding political and social environment The book goes on to examine the armed forces in action and highlights that to truly understand the militaries studies need to go beyond looking at the static structures

The Human Face of War Jim Storr,2011-10-27 Warfare is hugely important The fates of nations and even continents often rests on the outcome of war and thus on how its practitioners consider war The Human Face of War is a new exploration of military thought It starts with the observation that much military thought is poorly developed often incoherent and riddled with paradox The author contends that what is missing from British and American writing on warfare is any underpinning mental approach or philosophy Why are some tank commanders snipers fighter pilots or submarine commanders far more effective than others Why are many generals sacked at the outbreak of war The Human Face of War examines such phenomena and seeks to explain them The author argues that military thought should be based on an approach which reflects the nature of combat Combat fighting is primarily a human phenomenon dominated by human behaviour The book explores some of those human issues and their practical consequences The Human Face of War calls for and suggests a new way of considering war and warfare

Parameters ,1994 *Shaping Strategy* Risa Brooks,2018-06-05 Good strategic assessment does not guarantee success in international relations but bad strategic assessment dramatically increases the risk of disastrous failure The most glaring example of this reality is playing out in Iraq today But what explains

why states and their leaders are sometimes so good at strategic assessment and why they are sometimes so bad at it Part of the explanation has to do with a state's civil military relations In *Shaping Strategy* Risa Brooks develops a novel theory of how states' civil military relations affect strategic assessment during international conflicts And her conclusions have broad practical importance to anticipate when states are prone to strategic failure abroad we must look at how civil military relations affect the analysis of those strategies at home Drawing insights from both international relations and comparative politics *Shaping Strategy* shows that good strategic assessment depends on civil military relations that encourage an easy exchange of information and a rigorous analysis of a state's own relative capabilities and strategic environment Among the diverse case studies the book illuminates Brooks explains why strategic assessment in Egypt was so poor under Gamal Abdel Nasser prior to the 1967 Arab Israeli war and why it improved under Anwar Sadat The book also offers a new perspective on the devastating failure of U S planning for the second Iraq war Brooks argues that this failure far from being unique is an example of an assessment pathology to which states commonly succumb

Arming the Two Koreas Taik-Young Hamm, 2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea of Korea's military strength is partly a myth created by South Korea to justify a huge programme of rearmament

Britannia's Fist Peter Tsouras, 2008 England's support of the Confederacy triggers war with the Union and World War I

The Tank Debate John Stone, 2018-12-07 In *The Tank Debate* John Stone highlights the equivocal position that armour has traditionally occupied in Anglo American thought and explains why despite frequent predictions to the contrary the tank has remained an important instrument of war This book provides a timely and provocative study of the tank's developmental history against the changing background of Anglo American military thought

Japan, 1994 **The Journal of Military History**, 1995 **Infantry**, 1995 *Air Force Magazine*, 1994-07

Made, Not Born Bruce Newsome, 2007-09-30 Why do the combat capabilities of individual soldiers vary so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel

others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier's individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more

State Power and Armament of the Two Koreas Taik-young Hamm, 1996 Journal of International Affairs, 1995

The Hall of Mirrors Jim Storr, 2019-05-09 The military scholar and author of *The Human Face of War* analyses the nature of 20th century war and warfare in this wide ranging study The 20th Century was possibly the most violent and turbulent century in history The wars waged in those ten decades reshaped the globe and wreaked an incalculable toll on human life In *The Hall of Mirrors* military analyst and historian Jim Storr explores what can we learn from war and warfare in the 20th century Rather than presenting a narrative history *The Hall of Mirrors* takes a deep look at the nature of 20th Century war and warfare Storr looks at the strategy operational art and tactics employed He analyzes how technology developed and how those technologies affected military events He also considers the effect of individual human beings and organizations By 1919 the First World War was already over Millions had died empires had crumbled new nations had been born And yet the so called Great War was merely setting the stage for another eighty years of crisis conflict and change of alliances forged and broken of apparent chaos that can appear futile and yet has enormous consequence

Tanks at the Iron Curtain 1946-60 Steven J. Zaloga, 2021-11-23 A study of the Soviet and NATO armored forces that faced each other off in Central Europe in the early Cold War and how their technology tactics and doctrine were all rapidly developed For 45 years the most disputed point in the World was the dividing line between East and West in Europe here the use and development of tanks was key In this fully illustrated study author Steve Zaloga describes how Soviet and NATO tanks were deployed in the early years of the Cold War and how a generation of tanks such as the Soviet T 44 T 54 and IS 3 British Centurion US Army M26 M46 Pershing all developed during World War II saw extensive service after the war had ended Initial post war generation tanks including the Soviet T 54A T 10 heavy tank British late model Centurions Conqueror US Army M41 M47 M48 and the French AMX 13 are examined in detail alongside the most important technical trends of the era the development of shaped charge anti tank projectiles the influence of anti tank missiles and the introduction of chemical nuclear protection and night fighting equipment The book also considers the influence of post war doctrine and tactics on tank technology and the effect of regional conflicts such as the 1950 Korean War the war in Indo China and the 1956 Mid East War on tank warfare

The Red Army and the Second World War

Alexander Hill,2019-02-07 In a definitive new account of the Soviet Union at war Alexander Hill charts the development successes and failures of the Red Army from the industrialisation of the Soviet Union in the late 1920s through to the end of the Great Patriotic War in May 1945 Setting military strategy and operations within a broader context that includes national mobilisation on a staggering scale the book presents a comprehensive account of the origins and course of the war from the perspective of this key Allied power Drawing on the latest archival research and a wealth of eyewitness testimony Hill portrays the Red Army at war from the perspective of senior leaders and men and women at the front line to reveal how the Red Army triumphed over the forces of Nazi Germany and her allies on the Eastern Front and why it did so at such great cost
