Changing Social Science Critical Theory And Other Critical Perspectives:

Changing Social Science Daniel R. Sabia, Jerald Wallulis, 1983 **Changing Social Science** Daniel R. Sabia, Jerald Wallulis, 1983-06-30 Changing Social Science is both a description of and prescription for the current unease in the social sciences. It brings together articles by philosophers, sociologists, and political scientists who advocate changing the way social science is conceived and practiced. Focusing on the thought of past and present critics and proponents of critical inquiry, especially on the critical theory of Jürgen Habermas and on the disciplines of political science and sociology, collaborators on this volume support a critical form of social and political inquiry, outline its main characteristics, and examine its foundations, options, and unresolved problems. The book is divided into sections on reflexivity, methodology, and explanation and criticism and advocacy. From an introductory overview of the collection of articles and an account of the central issues in critical inquiry, discussions ensue on the methodological inadequacies and political implications of naturalist approaches to social and political inquiry; the nature and foundations of interpretive approaches to social science; the role, nature, and limits of causal explanations and causal theories of human action; the role of values in research and theory; and defenses and criticisms of the normative aspirations of both Habermas's critical theory and of critical social science in general.

Critical Theory and Methodology Raymond A. Morrow, Raymond Allen Morrow, David D. Brown, 1994-06-24 Critical Theory traces its roots from Marxism through the renowned Frankfurt School to a wide array of national and cultural traditions. Raymond Morrow's book traces the history and outlines the major tenets of critical theory for an undergraduate audience. He exemplifies the theory through an analysis of two leading social theorists: Jürgen Habermas and Anthony Giddens. Unique to this volume is the emphasis on the link between Critical Theory and empirical research and social science methodology, often thought to be incompatible.

The Recent Work of Jürgen Habermas Stephen K. White, 1989-08-25 Jürgen Habermas is one of the foremost philosophers and social theorists in the world today. But the complexity and breadth of his thought make him often difficult to understand. In this book, Stephen White offers a clear, accessible, and reliable introduction to Habermas's work, particularly that which he has written since the publication of *Knowledge and Human Interests* produced in English in 1971. During this period, new themes and directions have emerged in Habermas's thought, which culminated in *The Theory of Communicative Action*, a massive work that has not hitherto been the subject of extended commentary and analysis. This book is the first to provide a full-length study of Habermas's mature thought, locating the latter in the context of contemporary debates. White explains Habermas's ideas about action, rationality, communicative ethics, contemporary capitalism, and new social movements which characterize his later work. He also examines Habermas's interpretation of modernity, showing that although like his forerunners in the Frankfurt School, Habermas maintains a critical stance towards modernity's instrumentalization of reason, he nonetheless offers a sophisticated defense of the universal significance of other aspects of modern consciousness that are too often forgotten by many recent radical critics of modernity. Throughout, White presents

Habermas's work in such a way as to emphasize its coherence and to demonstrate how it constitutes the beginnings of a distinctive new research program in the social sciences. As a well researched and lucid account of Habermas's thought this book will appeal to readers wanting an introduction to the complexity of his ideas as well as to those already conversant with them. It will also interest social and political theorists concerned with the general theoretical issues that it covers. Jürgen Habermas Luca Corchia, 2010

(Post)Critical Methodologies: The Science Possible After the Critiques Patti Lather, 2017-02-03 In the World Library of Educationalists series international experts themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. Post Critical Methodologies forms a chronology through the texts and concepts that span Patti Lather's career. Examining post critical feminist and poststructural theories Lather's work is organized into thematic sections that span her 35 years of study in this field. These sections include original contributions formed from Lather's feminism and critical theory background. They contain her most cited works on feminist research and pedagogy and form a collection of both early and recent writings on the post and post post with a focus on critical policy studies and the future of post qualitative work. With a focus on the implications for qualitative inquiry given the call for scientifically based research in education this compelling overview moves through Lather's progressive thoughts on bridging the gap between quantitative and qualitative research in education and provides a unique commentary on some of the most important issues in higher education over the last 30 years. This compilation of Lather's contribution to educational thinking will prove compelling reading to all those engaged in student learning in higher education worldwide.

Critical Theory and Public Life John Forester, 1987 Jürgen Habermas's critical communications theory of society has excited widespread interest in recent years. The essays in this book explore the research implications of Habermas's theory for the analysis of modern problems of public life. Spanning the spectrum of the social sciences the essays relate critical theory to industrial policy under advanced capitalism education the mass media and consumerism public participation in planning policy analysis and critical historical studies. John Forester is Associate Professor of City and Regional Planning at Cornell University. Critical Theory and Public Life is included in the series Studies in Contemporary German Social Thought edited by Thomas McCarthy.

The Restructuring of International Relations Theory Mark A. Neufeld, 1995-09-14 Arguing for a theory of international politics committed to human emancipation this text suggests that international relations theory must move in a nonpositivist direction. It explores recent developments in the discipline including critical Gramscian postmodernist feminist and normative approaches.
