[Appearance, Discrimination and the Media](#)
Diana Garrisi, Laima Janciute, Jacob Johanssen, 2018-07-27 The portrayal of disfigurement in the UK media must change This policy brief is based on recent research that found a general negative and sensationalised attitude towards disfigurement in the media Disfigurement is a condition that can affect anyone at any time in life regardless their social or demographic background due to accidents or health conditions or be congenital In the UK one in 111 people have facial disfigurements In

order to improve the ways in which media portray disfigurement this policy brief argues that media should move away from sensationalised coverage on disfigurement and focus instead on the lived experiences of individuals with this condition It recommends strengthening diversity oriented editorial practices and training as well as media literacy education In addition it addresses the lack of guidelines on the portrayal of disfigurement and urges regulatory bodies to be more efficient in handling complaints

Dynamic Vision: From Images To Face Recognition Shaogang Gong,Stephen J

Mckenna,Alexandra Psarrou,2000-05-11 Face recognition is a task that the human vision system seems to perform almost effortlessly yet the goal of building computer based systems with comparable capabilities has proven to be difficult The task implicitly requires the ability to locate and track faces through often complex and dynamic scenes Recognition is difficult because of variations in factors such as lighting conditions viewpoint body movement and facial expression Although evidence from psychophysical and neurobiological experiments provides intriguing insights into how we might code and recognise faces its bearings on computational and engineering solutions are far from clear The study of face recognition has had an almost unique impact on computer vision and machine learning research at large It raises many challenging issues and provides a good vehicle for examining some difficult problems in vision and learning Many of the issues raised are relevant to object recognition in general This book describes the latest models and algorithms that are capable of performing face recognition in a dynamic setting The key question is how to design computer vision and machine learning algorithms that can operate robustly and quickly under poorly controlled and changing conditions Consideration of face recognition as a problem in dynamic vision is perhaps both novel and important The algorithms described have numerous potential applications in areas such as visual surveillance verification access control video conferencing multimedia and visually mediated interaction The book will be of special interest to researchers and academics involved in machine vision visual recognition and machine learning It should also be of interest to industrial research scientists and managers keen to exploit this emerging technology and develop automated face and human recognition systems It is also useful to postgraduate students studying computer science electronic engineering information or systems engineering and cognitive psychology

Account Control to BitLocker Phantasy, Image Consciousness, and Memory (1898-1925) Edmund Husserl, 2005-07-27

This is the first English translation of *Husserliana XXIII* the volume in the critical edition of Edmund Husserl's works that gathers together a rich array of posthumous texts on representational consciousness. The lectures and sketches comprising *Husserliana XXIII* come from a period of enormous productivity and pivotal development in Husserl's philosophical life extending from the years immediately preceding the *Logical Investigations* 1900-01 almost to the time of his retirement in 1928. They make available the most profound and comprehensive Husserlian account of image consciousness the awareness we have when we look at a picture or see a play and of its relation to art and the aesthetic. They explore phantasy in depth and furnish nuanced accounts of perception and memory. They enrich the Husserlian analysis of time consciousness and offer a fascinating picture of the sometimes tortuous paths Husserl took in his efforts to comprehend how the forms of representation are constituted and how they are related to one another and to perception. *Phantasy Image Consciousness and Memory* should prove to be an indispensable resource for Husserlian phenomenologists and for anyone else interested in thinking about these fundamental phenomena.

The Neo-Kantian Reader Sebastian Luft, 2024-11-01. The latter half of the nineteenth and the early part of the twentieth century witnessed a remarkable resurgence of interest in Kant's philosophy in Continental Europe the effects of which are still being felt today. *The Neo-Kantian Reader* is the first anthology to collect the most important primary sources in Neo-Kantian philosophy with many being published here in English for the first time. It includes extracts on a rich and diverse number of subjects including logic epistemology metaphysics philosophy of science and transcendental idealism. Sebastian Luft together with other scholars provides clear introductions to each of the following sections to the authors as well as to each text placing them in historical and philosophical context: the beginnings of Neo-Kantianism including the work of Hermann von Helmholtz Otto Liebman Friedrich Lange and Hermann Lotze the Marburg School including Hermann Cohen Paul Natorp and Ernst Cassirer the Southwest School including Wilhelm Windelband Heinrich Rickert Emil Lask and Hans Vaihinger responses and critiques including Moritz Schlick Edmund Husserl Rudolf Carnap and the Davos dispute between Martin Heidegger and Ernst Cassirer. *The Neo-Kantian Reader* is essential reading for all students of Kant nineteenth and twentieth century philosophy history and philosophy of science and phenomenology as well as to those studying important philosophical movements such as logical positivism and analytic philosophy and its history.

The ACT of Change Management Steve Mathew, 2011-09-12. Transforming an organization's culture involves influencing change one person at a time starting with the change leader. The majority of literature on the subject prescribes the development of teams and implementation of multi-stepped processes. However the biggest predictor of success is not just the process or the team but rather the character of the leader themselves. Before people will accept change they must first accept the change leader. *The ACT of Change Management* is a principled approach to leadership development that is both practical and realistic for today's workplace.

The Top Books of the Year Changing Appearance The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have captivated audiences this year. Changing Appearance : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
