*Success in Changing Environments* Manuela Stoll, 2007-10-29 Manuela Stoll focuses on two strategies to address change adapting to change and creating change Using a large scale survey among top executives of manufacturing firms in Germany she evaluates the importance of a range of resources competences and isolating mechanisms shields against imitation for the success of these strategies She shows that adapting to change has an important effect on firm performance and is mainly influenced by a firm's industry foresight abilities She also illustrates how these abilities can be strengthened

*Environments in a Changing World* John Huckle, Adrian Martin, 2014-09-19 While there is no shortage of books on the environment there are few introductory texts that outline the social theory that informs human geographical approaches to the interactions between ecology and society Students arriving at university often lack the understanding of history economics politics sociology and philosophy that contemporary human geography requires *Environments in a Changing World* addresses this deficit providing foundation knowledge in a form that is accessible to first year students and applied to the understanding of both contemporary environmental issues and the challenge of sustainability Students are challenged to develop and defend their own ethical and political positions on sustainability and respond to the need for new forms of ecological citizenship

**Evolution in Changing Environments** Richard Levins, 1968-08-21 Professor Levins one of the leading explorers in the field of integrated population biology considers the mutual interpenetration and joint evolution of organism and environment occurring on several levels at once Physiological and behavioral adaptations to short term fluctuations of the environment condition the responses of populations to long term changes and geographic gradients These in turn affect the way species divide the environments among themselves in communities and therefore the numbers of species which can coexist Environment is treated here abstractly as pattern patchiness variability range etc Populations are studied in their patterns local heterogeneity geographic variability faunistic diversity etc

*Organization in a Changing Environment* Russell K. Schutt, 1986-01-01 This study deals with the interfaces between bureaucratized social service agencies social workers and clients Russell K Schutt covers significant topics of the history and organization of labor unions He illuminates important questions concerning the degree to which initially democratic organizations are overcome by economic forces and how organizational and environmental features play a role in allowing this to happen The object of the study is large union of public welfare employees Spawned in the turbulent 1960s the young union once pledged to reform the welfare system had by the 1980s become a bureaucratic structure focused on traditional economic goals Dr Schutt has drawn on theory and research in the areas of organizations social movements and

public welfare and makes a unique contribution to each area A combination of intensive interviews questionnaire surveys archival records and observational notes provide the data for his analyses      **Coping with Changing Environments** Beate Lohnert, Helmut Geist, 2018-12-17 First published in 1999 A collection of empirical research and theoretical reflection on the modelling of environmental change from a social perspective The focus is on the endangered ecosystems in the developing world and examples are given from Asia Africa and Latin America After Regions at Risk Kaspersons et al 1995 UNO University Press it is the second compilation that focuses on regional empirical evidence with regard to Global Environmental Change On a national and European level it gives an overview of regional studies coming from the first German Priority Programme on the Social Dimensions of Global Environmental Change The introductory and concluding parts of the book reflect the strictly interdisciplinary approach of the research programme and form a step towards the understanding of human driving forces and responses to Global Change rooted in regional transformation processes The book offers a source of information and theoretical guidelines for the newly evolving scientific community of Global Change Research including teachers politicians and anyone involved in social and environmental policy and planning      Environmental Stress, Adaptation, and Evolution Rudolf Bijlsma, Volker Loeschcke, 1997-09-23 Most organisms and populations have to cope with hostile environments threatening their existence Their ability to respond phenotypically and genetically to these challenges and to evolve adaptive mechanisms is therefore crucial The contributions to this book aim at understanding from an evolutionary perspective the impact of stress on biological systems Scientists applying different approaches spanning from the molecular and the protein level to individuals populations and ecosystems explore how organisms adapt to extreme environments how stress changes genetic structure and affects life histories how organisms cope with thermal stress through acclimation and how environmental and genetic stress induce fluctuating asymmetry shape selection pressure and cause extinction of populations Finally it discusses the role of stress in evolutionary change from stress induced mutations and selection to speciation and evolution at the geological time scale The book contains reviews and novel scientific results on the subject It will be of interest to both researchers and graduate students and may serve as a text for graduate courses
