Thus India has not only been able to discard its image as the tortoise of the region but has also presented itself to the world as an economic powerhouse. The initiatives taken in the early 1990s continue to bring the rewards and have enabled India to become the fourth largest GDP in the world in terms of purchasing power. Today the young generation has the potential to absorb and master new technologies. The country has a healthy regulatory environment and strong financial system. Owing to its better returns on investments, it has been able to attract a large number of foreign investors. MNCs are today looking for low cost manufacturing bases and India is seen as their favourite choice. It has been estimated by the eminent economists that India may emerge as one of the three top engineering goods exporters among low cost offshore manufacturers with an export target of 250-300 billion by 2015. Likewise, it is becoming a major force in complex high end and high margin information technology services. Today there
