Geopolitics of a Changing Arctic. How do Russia, China and the United States Conceptualise the Changing Arctic? Fiona Kramer, 2024-10-18 Bachelor Thesis from the year 2023 in the subject Politics Topic International relations grade 1 3 University of Erfurt Staatswissenschaftliche Fakult t course Bachelorarbeit language English abstract This bachelorthesis examines the Arctic strategies of Russia China and the USA The three subjects of this study China Russia and the United States have different degrees of material interest in the Arctic which is rooted in tangible assets like oil gas and ice free shipping routes Among them China is a relatively recent participant in Arctic affairs whereas Russia and the United States hold prominent positions as influential players in the High North Over 60% of the Arctic landmass lies within their national borders While some of these interests can be quantified they also involve intricate and qualitative questions related to identity and the perception of other actors Though one thing connects all three states All have updated or published their first national Arctic strategy in the last 5 years detailing their Arctic ambitions for the future This indicates that the changing Arctic is responsible for a changed perception of the Arctic region which is worth exploring The exploration of this assumption through a qualitative content analysis provides useful insights allowing me to understand better how these states perceive the Arctic as a

geographical space themselves and other actors This in turn creates a more meaningful picture of the Arctic political discourse shedding light on the perception each country creates about itself which may help us to understand why countries behave the way they do and even possibly predict how they might behave in the future **The Popular Science Monthly** ,1897 **Appletons' Popular Science Monthly** William Jay Youmans,1897 **Bibliographie Mensuelle** United Nations Library (Geneva, Switzerland),1992 **Counterurbanization in England and Wales** D. F. W. Cross,1990

International Handbook of Urban Systems H. S. Geyer,2002 An edited group of 21 papers on urban change in addition the author contributed the four initial chapters on theoretical methods The remaining papers consider factors of urban change mostly for the latter part of the 20th century for countries in Europe the Americas South Africa and Asia Themes include migration population change and the impact of political change The international group of contributors is made up of academics in geography urban and regional planning and demography **The National Geographic Magazine** ,1891 Indexes kept up to date with supplements **The Changing American Countryside** Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life **England** Alan Edwin Day,1993 **The Elements of Physical Geography** Edwin James Houston,1884 *The Elements of Physical Geography, for the Use of Schools, Adacemies, and Colleges* Edwin James Houston,1883
