Changing Japan:

Focus on a Changing Japan United States. Congress. House. Committee on International Relations. Subcommittee on Asia and the Pacific, 2005 **Marriage in Changing Japan** Joy Hendry, 2010-10-18 This book approaches its subject from two angles First there is a detailed and descriptive analysis of the social organisation of and place of marriage in one community in Kyushu To this extent the study is a regional one and provides valuable ethnographic information The second angle however is to analyse this material in the light of other historical ethnographical writings on Japan which puts the regional material in a national context and brings together a great deal of information about Japanese marriage hitherto unpublished in English **Japan's Changing Generations** Gordon Mathews, Bruce White, 2012-10-02 This book argues that the generation gap in Japan is something more than young people resisting the adult social order before entering and conforming to that order Rather it signifies something more fundamental the emergence of a new Japan which may be quite different from the Japan of postwar decades It argues that while young people in Japan in their teens twenties and early thirties are not engaged in overt social or political resistance they are turning against the existing Japanese social order whose legitimacy has been undermined by the past decade of economic downturn The book shows how young people in Japan are thinking about their bodies and identities their social relationships and their employment and parenting in new and generationally contextual ways that may help to create a future Japan quite different from Japan of the recent past

Institutional and Technological Change in Japan's Economy Janet Hunter, Cornelia Storz, 2006-06-28 Institutional and technological change is a highly topical subject At the theoretical level there is much debate in the field of institutional economics about the role of technological change in endogenous growth theory At a practical policy level arguments rage about how Japan and the Japanese economy should plan for the future In this book leading economists and economic historians of Japan examine a range of key issues concerning institutional and technological change in Japan rigorously using discipline based tools of analysis and drawing important conclusions as to how the process of change in these areas actually works In applying these ideas to Japan the writers in this volume are focusing on an issue which is currently being much debated in the country itself and are helping our understanding of the world's second largest economy Facing Asia -

Japan's Role in the Political and Economic Dynamism of Regional Cooperation Blechinger, Verena, Legewie, Jochen, 2000-05-04 Facing Asia examines the political and economic processes of regionalism and regionalization in Asia with a focus on Japan and Japanese actors. The articles by eminent scholars address the forces that tie the region together. They treat topics ranging from Japanese bilateral and multilateral ODA and the activities of state and non state actors on the regional level to issues such as Japanese multinational corporations, foreign direct investment in Asia and regional financial institutions. Methodologically the authors draw on disciplinary strengths in either the social sciences or economics while organizing their treatment around a shared political economic perspective. By looking at Asia through an interdisciplinary lens the volume offers something to anyone interested in Japanese involvement in the politics and economics of the region. In the final chapter the editors weave together the different approaches to Japan's place in Asian regional cooperation in the 1990s and beyond.

Japan's Foreign Policy Maturation Kevin Cooney, 2013-09-05 The sudden end of the Cold War took the Japanese foreign policy community by surprise. The Yoshida Doctrine which served Japanese foreign policy so well during the Cold War is no longer a viable foreign policy option. This dissertation examines the restructuring of Japanese foreign policy since the end of the Cold War. Through a series of 56 interviews with Japanese foreign policy elites the changes in Japanese foreign policy are put into the context of the foreign policy literature.

Japan's New Middle Class Ezra F. Vogel, Henry Ford II Research Professor of the Social Sciences Emeritus Ezra F. Vogel, 1963-01-01

Japan's Relations with Southeast Asia Peng Er Lam, 2013 The Fukuda Doctrine has been the official blueprint to Japan's foreign policy towards Southeast Asia since 1977. This book examines the Fukuda Doctrine in the context of Japan Southeast Asia relations and discusses the possibility of a non realist approach in the imagining and conduct of international relations in East Asia. The collapse of 54 years of Liberal Democratic Party rule and the advent of a new Democratic Party of Japan raises the question of whether the Fukuda Doctrine is still relevant as a framework to analyse Tokyo's policy and behaviour towards Southeast Asia. Looking at its origins and norms amidst three decades of change the book argues that the Fukuda Doctrine is still relevant to Japan Southeast Asian relations and should be extended to relations between China and Japan if an East Asian Community is to be built. The book goes on to discuss the Fukuda Doctrine in relation to the power shift in Asia including the revitalization of Japan's security role. By providing a detailed understanding of a non western perspective of Japan's relationship with Southeast Asia this book is a useful contribution for students and scholars of Asian Studies Politics and International Relations.

Japan's Network Economy James R. Lincoln, Michael L. Gerlach, 2004-08-16 Japan's economy has long been described as network centric. A web of stable reciprocated relations among banks, firms and ministries is thought to play an important role in Japan's ability to navigate smoothly around economic shocks. Now those networks are widely blamed for Japan's faltering competitiveness. This book applies structural sociology to a study of how the form and functioning of this network economy has evolved from the prewar era to the late 90s. It asks whether in the face of

deregulation globalization and financial disintermediation Japan's corporate networks the keiretsu groupings particularly have withered away losing their cohesion and their historical function of supporting member firms in hard times Using detailed quantitative and qualitative analysis this book's conclusion is a qualified yes Relationships remain central to the Japanese way of business but are much more subordinated to the competitive strategy of the enterprise than the network economy of the past
