William Zartman,1995 This work uses 11 African case studies in its exploration of the phenomenon of collapsed states The writers consider the causes of collapse symptoms and early warning signs and how the situation was met They also assess the strengths and weaknesses of various responses such as UN action **Truth Commissions and Transitional Societies** Eric Wiebelhaus-Brahm,2010-01-05 This book uses a multi method approach to examine the impact of truth commissions on subsequent human rights protection and democratic practice and features cross national case studies on South Africa El Salvador Chile and Uganda **The Lord's Resistance Army** Tim Allen,Koen Vlassenroot,2010-07-08 The Lord s Resistance Army is Africa s most persistent and notorious terrorist group Led by the mysterious Joseph Kony it has committed a series of horrific human rights abuses including massacres and mutilations Since the mid 1980s it has abducted tens of thousands of people including large numbers of children forced to train as fighters The IC in 2005 issued warrants for Kony and his top commanders and the United States is backing a military campaign against the group But the LRA survives continuing to inspire both fascination and fear Authoritative but provocative The Lord s Resistance Army provides the most comprehensive analysis of the group available From the roots of the violence to the oppressive responses of the Ugandan government and the failures of the international community this collection looks at this most brutal of conflicts in fascinating depth and includes a remarkable first hand interview with Kony himself **Deadly Developments** Stephen and Downs Reyna,2005-08-04 Ten anthropologists trace the machinations of war and the effects of violence in capitalist states from their formation to the present This collection the newest volume in the War and Society series questions the foundations of classical social theory while investigating local and international conflict through the critical and cross cultural lens of social theory history and anthropology The essays combine to challenge the notion developed by social theorists such as Comte Spencer Durkheim and Engels that war will diminish with the formation and the perpetuation of a capitalist economy and industry The development of capitalist states and the nefarious and violent processes which must occur to reproduce capitalism are rarely realized and then infrequently analyzed Many western and ethnocentric scholarly representations of war succeed in hiding the deadly developments that occur as a result of capitalist state formation and relations **Conflict and Poverty in Africa** Ebenezer

Sunil Bastian, Robin

Luckham, 2003-06 Constitution making for democracy has always been a highly political and contested process It has never been more ambitious or more difficult than today as politicians and experts attempt to build democratic institutions that will foster peace and stability in countries torn by violent conflict The extended investigation out of which this book has grown has ranged across three continents It has examined such apparently intractable cases as Bosnia Herzegovina Sri Lanka and Fiji as well as apparent success stories like South Africa Ghana and Uganda Three groups of questions are explored How and by whom were democratic institutions re designed How have they functioned in practice what has been the relationship between democratic institutions and democratic politics How have they measured up to the pressures placed on them by ongoing violence poverty globalization and democratization itself The authors while regarding democracy as a general entitlement refuse to subscribe to a triumphalist view which sees it as a universal panacea Instead they seek to understand how democratic institutions actually facilitate or sometimes fail to facilitate improved governance and the management of conflict in a variety of national settings This thoughtful and empirical set of explorations is highly relevant to other societies wrestling with similar problems of institutional design in situations of democratic transition and or deep seated social conflict
