Things We Know: Fifteen Essays on Problems of Knowledge Frank B. Ebersole, 2001-12-11 Reading Ebersole requires and often succeeds in producing a radical reorientation of one's thinking from a book review Things We Know is a collection of fifteen essays that focus on perennial philosophical problems about knowledge The essays let you participate in Frank Ebersole's unique struggles to come to terms with such questions as Can we know the world the past the future of God's existence whether our actions are free the foundations of logic and language This is not just another philosophy book about problems of knowledge In Things We Know Ebersole by carefully using examples exposes the problems to be the products of philosophical pictures The examples also make the pictures less compelling Thus by reading this philosophy book readers can join the author in working to free themselves from some perplexing philosophical concerns How the Second Edition differs from the First Edition This edition differs from the First Edition University of Oregon Books 1967 in three ways An essay is added Everyman's Ontological Argument has been inserted as Essay 14 following two other essays about the ontological argument Everyman's Ontological Argument was published in the Fall 1978 issue of Philosophical Investigations The original Chapter 14 Where the Action Is is now Chapter 15 An essay is replaced The original Essay 3 How Philosophers See Stars has been replaced by a modified version that was printed in Philosophy Today no 2 1969 The replacement includes some further improvements The text is improved Throughout the book the author has made corrections stylistic improvements and changed the wording as needed to make clearer his line of thought Summary Each of the fifteen essays takes up a philosophical problem In most of the essays Ebersole first clarifies the problem and reviews common attempts to resolve the problem Then he focuses on the central ideas and terms used to state the problem and creates examples of people using the terms under consideration The examples are unique because of their focus on the context and point of what we say If his investigations fail to find a use of the terms that supports the philosophical problem he is led to conclude that the problem does not really derive from a philosophical insight but rather arises from a philosophical picture or model Preface The essays in Things We Know address some of the perennial philosophical problems of knowledge The essays are unified by being similar in method and philosophic aim Ebersole exposes a picture behind each problem In the essays he works through some of the ways that pictures control our thinking and tries to make the pictures less compelling Chapters 1

Globus,1987-01-09 Attempts to understand the human condition through dreaming reach back to antiquity especially in such classical Indian philosophical texts as the Rg Veda and the Upanisads In a more contemporary vein Dream Life Wake Life continues this investigation as it views the dream as an open window on the waking human condition The book discusses the major twentieth century contributions to dream theory beginning with Freud s 1900 psychoanalytical theory of dreaming and continuing through Jung s transpersonal and Boss s existential approaches Recent phenomenological cognitive and biological developments are also considered Dream Life Wake Life addresses human

creativity as illuminated by dreaming While Freud held a transformative view of dreaming in which dream life is secondhand formed by combining memory traces of diverse past waking experiences into novel compositions Gordon G Globus sees the process as creative the fundamental creative action inherent in the human condition **The Proof of the External World** Steven M. Duncan, 2008-04-01 Descartes attempt to ground the possibility of human knowledge in the existence of God was judged to be a complete failure by his contemporaries and this remains the universal opinion of philosophers to this day despite the fact that three and a half centuries of secular epistemology which attempts to ground the possibility of knowledge either in the unaided human intellect or in natural processes has failed to do any better Further the leading twentieth century attempts at theistic epistemology reject both the conception of knowledge and the standards of epistemic evaluation that Descartes takes for granted In this book partly an interpretation of Descartes and partly an attempt to complete his project the author attempts to show that a theistic epistemology incorporating Platonic and Aristotelian Thomist elements can revitalize the Cartesian approach to the solution of the central problems of epistemology including that most elusive of prizes the proof of the external world From the author s preface Philosophy for Young Children Berys Gaut, Morag Gaut, 2013-03 Philosophy for Young Children is a concise practical guide for teachers It contains detailed session plans for 36 philosophical enquiries that will enable them to introduce philosophy to their children quickly and with confidence
