Depression and How Your Dreams Can Help You Avoid It Anna Mancini, Over the course of this book we will examine the most common areas of loss and gain of life energy before considering some examples of dreams that signal damage to this energy which after a while if nothing is done to change the situation can trigger depression We will conclude by opening new horizons through the presentation of some little known forgotten or once forbidden technologies destined to recharge the human body with energy and therefore to act on the main cause of depression that is lack of energy in the body For more than thirty years I have observed the functioning of the human body at the junction between dream and reality Dreams show that the number one goal of the subconscious and the body is the preservation of LIFE Therefore the body and the subconscious never fail to inform us of everything that harms it They do this mainly through dreams but also through physical cues Dreams always sound the alarm bell when we lose too much energy and they often offer a solution long before it is too late to avoid depression By observing your dreams you will be able to get to know yourself better both psychologically and physically You will be able to better manage your energy and stop wasting or losing it through ignorance You will be able to understand how to make life choices which will allow you to almost always have enough energy at your disposal to remain mentally healthy and to enjoy an existence full of joy

Scott, 2010-12-07 Unlike any book you've ever read Mentored by a Millionaire is made up of fifteen mentoring sessions in which you will be mentored in the strategies skills and techniques used by super achievers who have become the world's most successful men and women You will be mentored in these sessions by Steve Scott a man who has not only made millions himself but has helped dozens of others make millions as well **Immaterial Existence** Sam Oputa, 2017-07-20 What is reality What is existence Does existence cease to exist Reality is hard to pin down to one definition Existence is being Existence is being aware Existence does not cease to exist And it all depends on reality your reality The very word existence should describe the only real thing that exists in the universe and beyond Consciousness Consciousness alone and nothing else Everything is conscious even if you do not see it The earth rotates Movement indicates that the earth is doing exactly what was intended for it to do What makes it rotate The sun

shines brightly always The moon shines brightly too in the night It is like clockwork It just happens It is programmed to happen like that It is consciousness at work Some call it nature the forces of nature they would chime in But nature is following a script a prewritten software Nature cannot change this script Nothing can change this script of a software for our earth planetary system and indeed the universe because the program is set from the beginning If you can understand that well you are welcome to a world created for the enjoyment of Consciousness If you think about it the universe seems to have been synchronized by an intelligence science is yet able to put a finger on Perhaps Thomas H Huxley a biologist and humanist said it best below It seems to me that there is a third thing in the universe to wit consciousness which I cannot see to be matter or force or any conceivable modification of either
