Education the first book in the series features 14 programs of social justice oriented research on life in schools families and
communities This work done by a diverse group of practitioner researchers educators and scholars connects the personal
with the political the theoretical with the practical and research with social and educational change These inquiries
demonstrate three distinct qualities Each is personal compelled by values and experiences researchers bring to the work
Each is passionate grounded in a commitment to social justice concerns of people and places under consideration Each is
participatory built on long term heart felt engagement and shared efforts The principle aspect of the inquiries featured in the
book series that distinguish it from others is that researchers are not detached observers nor putatively objective recorders
but active participants in schools families and communities Researchers have explicit research agendas that focus on equity
equality and social justice Rather than aiming solely at traditional educational research outcomes positive social and
educational change is the focal outcome of inquiry The researchers are diverse and their inquiries are far ranging in terms of

content people and geographic locations studied These studies reflect new and exciting ways of researching and representing experience of the disenfranchised underrepresented and invisible groups seldom discussed in the literature and challenge stereotypical or deficit oriented perspectives on these groups This book informs pre service and in service teachers educators educational researchers administrators and educational policy makers particularly those who advocate for people who are marginalized and those who are committed to the enactment of social justice and positive educational and social change
