Dress and Society T. F. Martin,R. Weech,2017-01-31 While traditional studies of dress and jewellery have tended to focus purely on reconstruction or descriptions of style chronology and typology the social context of costume is now a major research area in archaeology This refocusing is largely a result of the close relationship between dress and three currently popular topics identity bodies and material culture Not only does dress constitute an important means by which people integrate and segregate to form group identities but interactions between objects and bodies quintessentially illustrated by dress can also form the basis of much wider symbolic systems Consequently archaeological understandings of clothing shed light on some of the fundamental aspects of society hence our intentionally unconditional title Dress and Society illustrates the range of current archaeological approaches to dress using a number of case studies drawn from prehistoric to post medieval Europe Individually each chapter makes a strong contribution in its own field whether through the discussion of new evidence or new approaches to classic material Presenting the eight papers together creates a strong argument for a theoretically informed and integrated approach to dress as a specific category of archaeological evidence emphasising that the study of dress not only draws openly on other disciplines but is also a sub discipline in its own right However rather than delimiting dress to a specialist area of research we seek to promote it as fundamental to any holistic archaeological understanding of past societies

The Works of the Joseph Hall, 6 Joseph Hall,1863 **The English Woollen Industry, c.1200-c.1560** John Oldland,2019-01-15 This is the first book to describe the early English woollens industry and its dominance of the trade in quality cloth across Europe by the mid sixteenth century as English trade was transformed from dependence on wool to value added woollen cloth It compares English and continental draperies weighs the advantages of urban and rural production and examines both quality and coarse cloths Rural clothiers who made broadcloth to a consistent high quality at relatively low

cost Merchant Adventurers who enjoyed a trade monopoly with the Low Countries and Antwerp's artisans who finished cloth to customers needs all eventually combined to make English woollens unbeatable on the continent Never Too Thin Roberta Pollack Seid, 1989 Millions of American women are perpetual dieters many are stricken by devastating sometimes fatal eating disorders Though diet and therapy books abound few authors have tackled the complex sociocultural background that has influenced women and their view of themselves Social historian and analyst of popular culture Roberta Pollack Seid presents this perspective tracing and assessing the origins of weight consciousness up to our current mania She discovers a dangerous link dating to the early part of this century between medical prescriptives and fashion prerogatives A complex network of influences from politics and the rise of feminism to insurance company demographics and changes in the food industry have reinforced and propagated the tie between fitness and thinness Seid exposes our cherished axioms Thinner is healthier and Thinner is more beautiful As prejudices not truths Only by understanding this national obsession can women begin to free themselves from the terrible war it has made them unleash on their own bodies From publisher description
