Women as Interpreters of the Visual Arts, 1820-1979 Adele M. Holcomb, 1981 *Representing Russia's Orient*

Adalyat Issiyeva, 2020-11-11 Throughout history Russia's geo-political and cultural position between the East and West has shaped its national identity. *Representing Russia's Orient* tells the story of how Russia's imperial expansion and encounters with its Asian neighbors influenced the formation and development of Russian musical identity in the long nineteenth century. While Russia's ethnic minorities or *inorodtsy* were located at the geographical and cultural periphery, they loomed large in composers' perception and musical imagination and became central to the definition of Russianness itself. Drawing from a long forgotten archive of Russian musical examples, visual art, and ethnographies, author Adalyat Issiyeva offers an in-depth study of Russian art music's engagement with oriental subjects. Within a complex matrix of politics, competing ideological currents, and social and cultural transformations, some Russian composers and writers developed multidimensional representations of oriental others and sometimes even embraced elements of Asian musical identity. In three detailed case studies on the leader of the Mighty Five, Mili Balakirev, Decembrist sympathizer Alexander Aliabiev, and the composers affiliated with the Music Ethnography Committee, Issiyeva traces how and why these composers adopted foreign musical elements. In this way, she provides a fresh look at how Russians absorbed and transformed elements of Asian history and culture in forging a national identity for themselves.
