Floating Islands Richard J. Heggen, 2021-01-01 Floating Islands in science history the arts and any number of sightings elsewhere Harper's Young People, 1899 **HORROR AT THE VICARAGE** Bugs2writes, David G Hulson, 2017-11-22 Horror at the Vicarage by David G Hulson a member of Bugs2writes comprises eighteen short stories based in and around the crumbling vicarage belonging to the Church of St George Each of the stories is complete yet by each sharing the same settings and characters all the narratives are closely linked and related Jake narrates the supernatural events that occur whilst he and his family attempt to live ordinary lives as good citizens of the parish However things are never quite what they seem Instead behind a semblance of normality Jake and his parents are frequently forced to confront demons ghouls ghosts and vampires The devil's fiendish creatures spawn from the darkest of hell and rise to create and dispense evil wherever they go Filled with confusion terror suspense and mystery the atmosphere surrounding the antiquated vicarage and archaic graveyard evokes the very best of the horror genre Thick swirling mists crumbling tomb stones and dank dark crypts all add to the drama **Is a River Alive?** Robert Macfarlane, 2025-05-20 From the celebrated writer observer and naturalist Robert Macfarlane comes a brilliant perspective shifting new book which answers a resounding yes to the question of its title At the heart of Is a River Alive is a single transformative idea that rivers are not mere matter for human use but living beings who should be recognized as such in both imagination and law Macfarlane takes the reader on a mind expanding global journey into the history futures people and places of the ancient urgent concept Around the world rivers are dying from pollution drought and damming But a powerful movement is also underway to recognize the lives and the rights of rivers and to re animate our relationships with these vast mysterious presences whose landscapes we share The young rights of nature movement has lit up activists artists law makers and politicians across six continents and become the focus for revolutionary thinking about rivers in particular The book flows like water from the mountains to the sea over three major journeys The first is to northern Ecuador where a miraculous cloud forest and its rivers are threatened with destruction by Canadian gold mining The second is to the wounded rivers creeks and lagoons of southern India where a desperate battle to save the lives of these waterbodies is underway The third is to northeastern Quebec where a spectacular wild river the Mutehekau or Magpie is being defended from death by damming in a river rights campaign led by an extraordinary Innu poet and leader called Rita Mestokosho Is A River Alive is at once a literary work of art a rallying cry and a catalyst for change It is a book that will open hearts spark debates and challenge perspectives A clarion call to re centre rivers in our stories law and politics it invites us to radically re imagine not only rivers but life itself At the heart of this vital beautiful book is the recognition that our fate flows with that of rivers and always has *Geology, Meteorology & Ethnology of Meghalaya* Thomas Oldham, 1856 The Golden Toad Trevor Ritland, Kyle Ritland, 2025-06-17 The Costa Rican cloud forest a mysterious amphibian killer and a vanished species with support from Leonardo DiCaprio's Re wild campaign twin documentarians and environmental writers

follow their father's footsteps into the heart of the modern extinction crisis. As young boys Trevor and Kyle Ritland were fascinated by the magnificent golden toad of Costa Rica, a brilliant species their biologist father showed them in his projector's slide shows. Native to only one wind-battered ridgeline high on the continental divide above the cloud forests of Monteverde, thousands of golden toads would congregate for a few weeks each year in ephemeral pools among the twisted roots to mate, deposit their offspring, and retreat again beneath the earth. But from one year to the next, the toads disappeared without a trace; the last of them vanished more than thirty years ago. Since then, only rumors remain, alleged sightings by local residents which beg the question: could the golden toad still be alive? In *The Golden Toad*, Trevor and Kyle set off to investigate an environmental mystery with unexpected revelations, a story that speaks to our own collective and uncertain future. Guided by Costa Rican naturalists, including the last person to have seen the golden toad alive, Trevor searches for survivors while Kyle hunts the killer, and their paths lead them through an imperiled forest, a deadly pandemic, and a changing climate, finally intertwining at the site of the golden toad's last emergence deep in Monteverde's Bosque Eterno de Los Niños. The toad's demise becomes a haunting foretelling of an approaching ecological crisis, but with a gold lining on the horizon. *The Golden Toad* changes the conversation around extinction, climate change, and conservation while exploring environmental grief, resurrection, and hope in a changing world.
