The Use of Remote Sensing Data for Drought Assessment and Monitoring in Southwest Asia

Prasad Srinivasa Thenkabail, M. S. D. N. Gamage, 2004 This report describes the development of the near real time drought monitoring and reporting system for the region which currently includes Afghanistan Pakistan and western parts of India The system is based on drought related indices derived from high resolution remote sensing data MODIS The unique feature of the study is the development of regression relationships between drought related indices obtained from MODIS and AVHRR data which have different pixel resolution and optical characteristics The goal is to make the system available via Internet to all stakeholders in the region

Mapping drought patterns and impacts: a global perspective

Nishadi Eriyagama, V. Y. Smakhtin, Nilantha Gamage, 2009 The study examines the global pattern and impacts of droughts through mapping several drought related characteristics either at a country level or at regular grid scales It appears that arid and semi arid areas also tend to have a higher probability of drought occurrence It is illustrated that the African continent is lagging behind the rest of the world on many indicators related to drought preparedness and that agricultural economies overall are much more vulnerable to adverse societal impacts of meteorological droughts The study also examines the ability of various countries to satisfy their water needs during droughts using storage related indices

Restoring Ecosystems and Assessing Drought Risk - Approaches and Practices, 2025-09-17 This book *Restoring Ecosystems and Assessing Drought Risk Approaches and Practices* highlights interdisciplinary research and case based insights focused on ecosystem restoration and drought risk monitoring It presents five chapters that span diverse ecological regions and methodological approaches Chapter 1 examines the long term ecological and social impacts of plantation forests in the Ethiopian highlands It emphasizes the role of effective forest management in restoring degraded landscapes which includes mixed species plantations and local knowledge integration Chapter 2 focuses on peri urban landscapes emphasizing the importance of local engagement and spatial planning in enhancing agri ecosystem services It provides a participatory planning model aimed at integrating ecosystem services into urban development policies Chapter 3 provides an important case study on emerging soil contaminants and the need for baseline assessments and targeted restoration protocols in floodplain environments affected by industrial and geochemical dynamics Chapter 4 investigates historical drought trends using key meteorological indices It demonstrates increasing drought frequency and severity particularly in southern Portugal and calls for improved planning and mitigation strategies Chapter 5 evaluates multiple drought indices to identify the most effective tools for capturing complex drought dynamics in South Africa It emphasizes the importance of a more comprehensive assessment of drought conditions and recommends enhanced monitoring for adaptive water resource management The book provides a comprehensive overview of contemporary research and approaches in ecosystem restoration and drought risk assessment It offers valuable insights for researchers practitioners planners and policy makers working across disciplines to address the twin challenges of ecosystem degradation and climate vulnerability

Global Assessment Report on Disaster Risk Reduction 2021

United Nations

Office for Disaster Risk Reduction, 2021 Droughts have deep widespread and underestimated impacts on societies ecosystems and economies They incur costs that are borne disproportionately by the most vulnerable people The extensive impacts of drought are consistently underreported even though they span large areas cascade through systems and scales and linger through time affecting millions of people and contributing to food insecurity poverty and inequality Climate change is increasing temperatures and disrupting rainfall patterns increasing the frequency severity and duration of droughts in many regions across the globe As we move towards a 2 C warmer world urgent action is required to better understand and more effectively manage drought risk to reduce the devastating toll on human lives and livelihoods and ecosystems This report explores the systemic nature of drought and its impacts on achievement of the Sendai Framework for Disaster Risk Reduction the SDGs and human and ecosystems health and wellbeing

Water Trading and Global Water Scarcity

Josefina Maestu, 2013 Water scarcity is an increasing problem in many parts of the world yet conventional supply side economics and management are insufficient to deal with it In this book the role of water trading as an instrument of integrated water resources management is explored in depth It is also shown to be an instrument for conflict resolution where it may be necessary to reallocate water in the context of increasing scarcity Recent experiences of implementation in different river basins have shown their potential as instruments for improving allocation These experiences however also show that there are implementation challenges and some limitations to trading that need to be considered This book explores the various types of water trading formulas through the experience of using them in different parts of the world The final result is varied because in most cases trading is conditioned by the legal and institutional framework in which the transactions are carried out The role of government and the definition of water rights and licenses are critical for the success of water trading The book studies the institutional framework and how transactions have been undertaken drawing some lessons on how trading can improve It also analyses whether trading has really been a positive instrument to manage scarcity and improve water ecosystems and pollution emission problems in those parts of the world which are most affected The book concludes by making policy proposals to improve the implementation of water trading

Drought and the Human Story R.L.

Heathcote, 2016-05-13 Drought has been a long companion in the human story Mythologised as the devastating Bull of Heaven in one of the earliest heroic legends to come out of Mesopotamia drought has continued to wreak havoc upon societies in many cases playing a significant role in their final demise For societies in the 21st Century drought hovers on all horizons the ultimate drought proofing of society long sought remains elusive This study of the human conceptualization of drought in a global setting examines the historical record from early human society through to present day concerns to explore how and why attitudes to drought have changed and why the mitigation of its impacts has become more difficult To offer a more lasting strategy for protection against drought the author argues that physical scientists need to combine their skills in understanding global ecology and their technological expertise with the social scientists awareness of the socio

economic political and cultural contexts in which modern societies operate Both will have to ensure that their cooperative strategies for drought management will be understood and supported by the public If this cooperation can be achieved the future rampages of the Bull of Heaven may be contained Earth Observation Applications and Global Policy Frameworks Argyro Kavvada,Douglas Cripe,Lawrence Friedl,2022-09-21 Applying Earth science knowledge to sustainable development disaster risk reduction and climate action Data and insights from Earth observations are critical for assessing the health of our planet monitoring change and addressing societal challenges from the local to the global scale Earth Observation Applications and Global Policy Frameworks presents case studies of Earth science information integrated with statistics and socioeconomic data for managing development targets improving disaster resilience and mitigating and adapting to climate change It also showcases open collaboration among researchers United Nations and government officials entrepreneurs and the public Volume highlights include Case studies of projects working with local and national governments and through public private partnerships to make the most of the large volume of complex and diverse Earth science information sources Applications from diverse disciplines including wetland preservation food security water quality marine conservation disasters urbanization drought and land degradation and greenhouse gas monitoring Examples of internationally coordinated initiatives that are driving progress on three landmark United Nations agreements Resources for decision makers and practitioners in local and national governments The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity Its publications disseminate scientific knowledge and provide resources for researchers students and professionals Find out more in this Q A with the lead editor **Integrated Drought Management, Volume 2** Vijay P.
