

This treatment protocol is meant to serve as a guideline for Indiana facilities to use in developing their own pharmacologic treatment protocols and is not intended to mandate methods of care for infants diagnosed with Neonatal Abstinence Syndrome (NAS) and in need of pharmacologic treatment. *An accompanying NAS Pharmacologic Therapy Protocol Flowsheet has been developed and can be found at (insert link)*

The protocol reflects current SAMHSA recommendations. There is no 'best' treatment protocol identified as yet for infants with NAS. The protocol outlined here has considerable clinical experience behind it and has been reviewed by a number of neonatologists, pediatricians, and a clinical pharmacologist. Its implementation, as with all clinical protocols, requires clinical judgment and experience to use successfully. It is based on conventional use of morphine (prn or scheduled dosing) along with FNASS (Finnegan) scoring. An option for use of methadone is also given for institutions that prefer it, and reasons to choose one over the other are discussed.

This pharmacologic therapy protocol is designed to be used as part of a full institutional protocol that includes identification, monitoring, and testing of infants at risk for NAS prenatally, at admission for birth, and in the newborn nursery; a full non-pharmacologic treatment protocol (<https://www.in.gov/laboroflove/files/Non-Pharmacologic%20Treatment%20Protocol%20Bundle.pdf>); and, a complete discharge planning protocol (insert weblink) including maternal behavioral support services.

Research into NAS treatment methods is currently an active area of inquiry. It is likely that new treatment methods (use of buprenorphine in infants as front-line treatment, the Eat-Sleep-Console scoring system instead of the FNASS, and so on) will change our methods of treatment over the next three to five years. While these protocols are still being studied, practitioners should carefully consider any early clinical implementation of these methods before they are fully vetted in peer-reviewed literature.
