Sourcebook of Criminal Justice Statistics, 1994 *Drug Therapy During Pregnancy* Tom K. A. B. Eskes, Mieczyslaw Finster, 2013-10-22 Drug Therapy During Pregnancy is a collection of papers dealing with the risks and benefits of drug treatment for both mother and fetus One paper notes that the total use of medication during pregnancy in the Netherlands has decreased from 82.7 % to 71.7 % The paper also points out the lack of a relationship between the number or type of congenital anomalies and the use of medication Another paper assesses fetal drug exposure in two ways firstly through the physicochemical characteristics of the drug and the way it is handled by the mother in order to estimate placental passage and fetal exposure Secondly through the utilization of pharmacokinetic models estimating the probable time course of drug concentrations in the fetal maternal unit One paper investigates the effects of hypertension during pregnancy in which the etiology of hypertension a group of disorders with one common abnormality remains unsolved with a clinical diagnosis that is not always accurate Treatment differs widely depending on the type chronic hypertension albuminuric hypertension and hypertensive crises during pregnancy One paper suggests that to prove any environmental exposure to a particular substance affecting pregnancy the exact timing of exposure must be established large samples are necessary possibly on a national or international scale The paper cites as example the four year documentation period of the 50% to 80% incidence of malformations due to thalidomide General medicine practitioners obstetricians gynecologists and researchers dealing with pharmacology pharmacokinetics toxicology or embryology will find the collection valuable

S. Ledward, D. F. Hawkins, Leo Stern, 2013-11-11 Everyone involved in obstetric practice at the present time will be well aware of the complexities of drug interactions in the mother and fetus and in the newborn baby Perhaps the most spectacular manifestations of these drug interactions are those that result in teratogenic effects but the implications of drug therapy generally in pregnancy range far wider than the hazards of inducing fetal malformation It must also be realised that there are hazards in withholding some therapeutic agents from pregnant women and these hazards have to be weighed against the dangers of indiscriminate drug therapy It is often very difficult to obtain relevant information about any given compound in relation to its use in pregnancy and it is therefore appropriate to provide a handbook which brings together information about a wide variety of drugs in a form which allows ready access for the practising clinician Rodney Ledward first discussed this project with me some years ago and it seemed to me at the time that with his background as both a pharmaceutical chemist and an obstetrician that his talents were particularly well suited to this task In conjunction with Professor Hawkins he has produced a concise reference book for use in clinical practice which I feel confident will prove to be invaluable to all those practising obstetrics at all levels of seniority The book covers the use of drugs during pregnancy but it also includes sections on the transfer of drugs into breast milk **Drug Handbook in Obstetrics & Gynecology** AK Debdas, 2021-07-17 PART I OBSTETRICS 1 Hypertensive Disorders and Heart Disease 2 Diseases of Respiratory System 3 Diseases of Gastrointestinal Tract 4 Diseases of Genitourinary System 5 Endocrine Disorders During Pregnancy 6 Dermatological Lesions During Pregnancy 7 Disorders of Coagulation During Pregnancy 7 Disorders of Coagulation During Pregnancy 8 Problems Related to Central Nervous System 9 Autoimmune Diseases During Pregnancy 10 Anti malarial Drugs for the Pregnant 11 Anti toxoplasma Drugs for the Pregnant 12 Some Typical Foetus related Problems of Antenatal Period 13 Night Cramps and Migraine During Pregnancy 14 Oxytocics and Tocolytics 15 Drugs for Ripening of Cervix 16 Drugs for Labour Analgesia 17 Some Typical Problems of Puerperium 18 Scope and Safety of Some Commonly Prescribed Drug groups During Pregnancy and Lactation 19 Recommendation for Immunisation During Pregnancy 20 Drugs for Resuscitation of Newborn 166 20 1 Current Practice of Use of Drugs for Resuscitation of Newborn 21 Safety Guidelines About Use of Drugs During Pregnancy and Lactation PART II GYNAECOLOGY 1 Medical Treatment of Menstrual Disorders 2 Medical Treatment
