Drug Policy and the Decline of the American City Sam Staley, 2017-07-05 The drug trade is a growth industry in most major American cities fueling devastated inner city economies with revenues in excess of 100 billion In this timely volume Sam Staley provides a detailed in depth analysis of the consequences of current drug policies focusing on the relationship between public policy and urban economic development and on how the drug economy has become thoroughly entwined in the urban economy The black market in illegal drugs undermines essential institutions necessary for promoting long term economic growth including respect for civil liberties private property and nonviolent conflict resolution Staley argues that America s cities can be revitalized only through a major restructuring of the urban economy that does not rely on drug trafficking as a primary source of employment and income the inadvertent outcome of current prohibitionist policy Thus comprehensive decriminalization of the major drugs marijuana cocaine and heroin is an important first step toward addressing the economic and social needs of depressed inner cities Staley demonstrates how decriminalization would refocus public policy on the human dimension of drug abuse and addiction acknowledge that the cities face severe development problems that promote underground economic activity and reconstitute drug policy on principles consistent with limited government as embodied in the U S Constitution and Bill of Rights Designed to cross disciplinary boundaries Staley s provocative analysis will be essential reading for urban policymakers sociologists economists criminologists and drug treatment specialists

The Third Way Cyrille J.C.F. regarding the production distribution and consumption of cannabis Generally speaking the legalization of cannabis in Uruguay and in some states of the United States of America in particular Colorado and Washington State has given a powerful impetus to the discussion about the cannabis policy In the Netherlands that discussion has become increasingly relevant over the past years because of the struggle of coffeeshop owners and political parties This volume offers the first English language analysis of the situation in the Netherlands in order to make a contribution to the international debate on this heated topic Since the 1960s the Dutch cannabis policy has been an important point of reference in the international discussion about the policy that should be pursued regarding the use of cannabis However in international and foreign literature about cannabis policy the developments in the Netherlands are often depicted in an incomplete or one sided manner which has a negative impact on the quality of the international debate about what has happened and what should happen now This volume seeks to redress that imbalance
