

# ESSENTIAL DRUG CONCEPT

- ❑ Essential drug concept was first evolved in 28<sup>th</sup> World Health Assembly in 1975. The expert committee produced an initial model list of essential drugs in 1977.
- ❑ Essential drugs are those that satisfy the health care needs of the majority of the population they should therefore be available always in adequate amounts and in the appropriate dosage forms.
- ❑ The purpose of such model list is to extend the accessibility of the most necessary drug to those populations whose basic health needs can't be met by the existing system.
- ❑ The lists in majority of the countries are stratified according to diff. types of req. and expertise present at diff. levels of healthcare infrastructure.
- ❑ The lists are flexible enough to accommodate new drugs and newer information on established drugs.
- ❑ Action program on essential drugs was launched in 1981. Since then a large number of countries have adopted an essential drug program.
