Towards a Social Science of Drugs in Sport Jason Mazanov, 2013-09-13 The debate around the role of drugs in sport is vibrant There is a wealth of evidence from the hard end of science telling us how drugs work how drug testing works and how many athletes have fallen foul of the system The evidence from social science is still building momentum For example what makes an athlete use a performance enhancing substance To win simply fails to explain the drug use behaviour we see among athletes This book provides a foundation for anyone trying to understand the drugs in sport problem beyond the hard science by looking at the people factor from different perspectives After building a case for the social science of drugs in sport it is examined from the ethical sociological economic legal and psychological points of view The book concludes with a definitive statement about what researchers policy makers sports administrators athletes and fans can do to achieve a social science of drugs in sport that puts people firmly in the centre of the debate This volume was published as a special issue of Sport in Society

Drugs and Sports Facts On File, Incorporated, 2007 Provides an overview of the issues associated with the use of

drugs in sports with a glossary of terms and a fully annotated bibliography **Sport, Policy and Politics** Barrie Houlihan, 2002-02-07 Sport Policy and Politics is a genuinely comparative analysis of sport policy making in five countries Australia Canada Ireland the United Kingdom and North America Some of the issues raised in this book include the process of sport policy making the administrative framework for sport the responsibilities of central or federal governments state governments and local authorities the division of responsibility between different levels of government how policy making has addressed the topical problems of drug abuse in athletes and the provision of sport and physical education in schools

Managing Drugs in Sport Jason Mazanov, 2016-10-04 As ongoing high profile drug scandals have demonstrated sports organisations rarely have a coherent strategy to manage the role and relationship their sport has with different types of drugs from alcohol to supplements to prescription drugs to doping This important and timely book argues that drug control led integrity management of sport is more than an ideological battle around doping The relationship sport has with the drugs industry has become a much broader management problem The breadth of the problem compels stakeholders in sport including athletes coaches fans public servants and sports managers to understand better the issues in pursuit of effective strategies and responses Drawing on cutting edge management theory this book explores the dilemma of drugs in sport It introduces the policy and business contexts that have shaped responses to this issue and examines its significance to sport and integrity management including human resource management marketing and risk management It discusses practical management concerns such as working with scientists and anti doping organisations and offers clear recommendations for the future management of sports integrity The first book to offer a complete framework for a drugs management strategy for sport Managing Drugs in Sport is essential reading for all advanced students researchers and practitioners working in sport management sport business sport policy sport governance and business ethics The War on Drugs in Sport Vanessa

McDermott, 2015-10-23 This book is an innovative and compelling work that develops a modified moral panic model illustrated by the drugs in sport debate Drawing on Max Weber's work on moral authority and legitimacy McDermott argues that doping scandals create a crisis of legitimacy for sport governing bodies and other elite groups This crisis leads to a moral panic where the issue at stake for elite groups is perceptions of their organizational legitimacy The book highlights the role of the media as a site where claims to legitimacy are made and contested contributing to the social construction of a moral panic The book explores the way regulatory responses in this case anti doping policies in sport reflect the interests of elite groups and the impact of those responses on individuals or folk devils The War on Drugs in Sport makes a key contribution to moral panic theory by adapting Goode and Ben Yehuda's moral panic model to capture the diversity of interests and complex relationships between elite groups The difference between this book and others in the field is its application of a new theoretical perspective supported by well researched empirical evidence **Drugs & Doping in**

Hunt, 2011-01-15 On August 26 1960 twenty three year old Danish cyclist Knud Jensen competing in that year s Rome Olympic Games suddenly fell from his bike and fractured his skull His death hours later led to rumors that performance enhancing drugs were in his system Though certainly not the first instance of doping in the Olympic Games Jensen s death

serves as the starting point for Thomas M Hunt's thoroughly researched chronological history of the modern relationship of doping to the Olympics Utilizing concepts derived from international relations theory diplomatic history and administrative law this work connects the issue to global political relations During the Cold War national governments had little reason to support effective anti doping controls in the Olympics Both the United States and the Soviet Union conceptualized power in sport as a means of impressing both friends and rivals abroad The resulting medals race motivated nations on both sides of the Iron Curtain to allow drug regulatory powers to remain with private sport authorities Given the costs involved in testing and the repercussions of drug scandals these authorities tried to avoid the issue whenever possible But toward the end of the Cold War governments became more involved in the issue of testing Having historically been a combined scientific ethical and political dilemma obstacles to the elimination of doping in the Olympics are becoming less restrained by political inertia

Spitting in the Soup Mark Johnson,2016-07-01 Doping is as old as organized sports From baseball to horse racing cycling to track and field drugs have been used to enhance performance for 150 years For much of that time doping to do better was expected It was doping to throw a game that stirred outrage Today though athletes are vilified for using performance enhancing drugs Damned as moral deviants who shred the fair play fabric dopers are an affront to the athletes who don't take shortcuts But this tidy view swindles sports fans While we may want the world sorted into villains and victims putting the blame on athletes alone ignores decades of history in which teams coaches governments the media scientists sponsors sports federations and even spectators have played a role The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup that is to tell the truth about the spectacle we crave In **Spitting in the Soup** sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports Johnson unwinds the doping culture from the early days when pills meant progress and uncovers the complex relationships that underlie elite sports culture the essence of which is not to play fair but to push the boundaries of human performance It's easy to assume that drugs in sports have always been frowned upon but that's not true Drugs in sports are old It's banning drugs in sports that is new **Spitting in the Soup** offers a bitingly honest clear eyed look at why that's so and what it will take to kick pills out of the locker room once and for all **The Ethics of Performance Enhancing Drugs in Sports** Sandra A.

McCalla,2024-08-06 It may be a popular opinion that sports and ethics are incongruent or contradictory but ethical principles in sports are in fact integral for its protection Because of this invalid popular opinion a new conversation on ethical principles and issues in sports is warranted This should start here with a philosophical investigation into the areas of epistemology and autonomy with an effort to address ethical issues associated with the use of performance enhancement drugs doping in sports fair play equity and responsibility Readers are introduced to a new theoretical approach to addressing ethical issues in sports These issues are based on arguments advanced on responsible freedom perspective knowledge and duties that can be utilized by sports stakeholders athletes team doctors fans sporting organizations coaches etc as they strive for success and

minimize unfair practices Important questions are posed concerning respect for others respect for rules respect for the game and respect for self Also an investigation into ethics and doping is conducted to unravel whether doping athletes impose undue limitations on their freedom Thus the idea of absolute freedom is questioned and privileged freedom is explored
