Drugs Affecting Lipid Metabolism Viii:

Drugs Affecting Lipid Metabolism VIII David Kritchevsky, 2012-12-06 The Proceedings of the Eight International Symposium on Drugs Affecting Lipid Metabolism 8th D A L M is the subject of this volume Since the first symposium in 1960 each successive meeting has broken new ground in the field of pharmacological control of lipid levels offering new and stimulating insights and exposing the audience to the state of the art The field has progressed sufficiently to permit discussion of the cellular biology of athero sclerosis The opening session was devoted to pathology macrophages lipoproteins and their receptors and cholesteryl ester metabolism Because of the recent emergence of new apolipoprotein technology a workshop devoted solely to apolipoprotein methodology was introduced followed by a plenary session devoted to their metabolism and structure Another rapidly developing area of atherosclerosis research is non invasive assessment of this condition Accordingly a session was devoted to new techniques for this research modality The final plenary sessions were devoted to the roles of drugs and diet in atherosclerosis cause treatment and mechanisms of action The meeting was summarized by Dr O J Pollak one of the founding fathers of this field There were nine sessions of proffered papers whose abstracts appear in this volume In addition special workshops to be reported elsewhere were devoted to several drugs including Oxyzanol Probucol and Etofibrate

Anderson, 2012-12-06 Twenty years ago the very idea of an international conference on the fiber contained in plant food would have been totally inconceivable At that time fiber was generally viewed as an inert component of food of no nutritional value and consequently considered as a contaminant the removal of which would enhance the purity of a product It was measured by a now obsolete and almost worthless test introduced in the last century for veterinary rather than human nutrition and what was measured was referred to as crude fiber containing part of the cellulose and lignin but none of the numerous components of fiber now known to play important roles in the maintenance of health There were a few lone voices prior to the last two decades who had extolled the laxative properties of the undigested portion of food assuming that these

were related to its irritant action on the bowel mucosa In retrospect this was a total misconception and softage would have been a more appropriate term than roughage since its presence insured soft not irritating colon content
