   The Analysis, Communication, and Perception of Risk B.John Garrick,Willard C. Gekler,2013-11-11 The 1989 Annual Meeting of the Society for Risk Analysis dramatically demonstrated one of the most important reasons for having the Society to bring together people with highly diverse backgrounds and disciplines to assess the common problems of societal and individual risks The physical scientists emphasized the analytical tools for assessing environmental effects and for modeling risks from engineered systems and other human activities The health scientists presented numerous methods of analyzing health effects including the subject of dose response relationships especially at low exposure levels never an easy analysis The social and political scientists concentrated on issues of risk perception communication acceptability and human touch Others discussed such issues as cost benefit analysis and the risk based approach to decision analysis Use of risk assessment methods for risk management continued to be a matter of strong opinion and debate The impacts of state and federal regulations existing and planned were assessed in sessions and in luncheon speeches These impacts show that risk analysis practitioners will have an increasingly important role in the future They will be challenged to provide clear easily understood evaluations of risk that are responsive to society s concern for risk as evidenced in laws and regulations Of course the various risk analysis specialties overlapped in domains of interest **Design and Analysis of Fault-tolerant Digital Systems** Barry W.
