Stovall Ph. D., Arthur J. Stovall, 2005 The mission or purpose Dr Stovall endeavors to transmit in this book *The Last Remnants of Slavery An African American Dilemma* is support for an intervention that will start a Cultural Revolution for change to end the last chapter to a chaotic dysfunctional process in the lives of African Americans There are many historical correct and factual representations about slavery but until now there have been no examination of slavery's impact on African Americans This book is a must read that deals with the Last Remnants from the past that is still influencing the economic social and political values in African American communities The processes of the remnants discouraged Africans and subsequent African Americans from any organized effort at providing for their communities economic social and political representation that would have allowed self sufficiency after emancipation and proclamation in 1865 The Africans unbeknown to themselves became guardians of the poverty paradigm and past it to their future generations not just poverty as a lifestyle but the socialization process that has ensured its perpetuation The effects of the Last Remnants tactics have grown roots in the lifestyle of the African American families and communities The outcome of the Last Remnants is evident by the crime reports which suggest that 90% of the incarcerated population is made up of African American's youth between the age of 18 to 38 and 70% are substance abuse related offenses Diversity Issues in Substance Abuse Treatment and Research Sana Loue, 2007-06-02 Although the term diversity is widely used there is often no agreed upon meaning or how attention to diversity should be operationalized within the context of programming or research This text provides a foundation for the examination of such issues with suggestions for the integration of various approaches into substance use treatment programs and research The impetus for this work derived from multiple interactions over a period of several years with colleagues students research participants and community based providers who noted the frequent inattention paid to such concerns in the context of treatment and research often despite an acknowledgment of a group's particular historical legacy in the United States and the impact of that history on the initiation and prolongation of substance use within a specific community or the barriers to treatment that may have resulted Chapter 1 defines what is meant by diversity through an examination of related terms such as culture ethnicity race sex gender and sexual orientation Clearly this discussion does not and cannot reflect all possible permutations of human existence that reflect diversity For instance although the text does make mention of considerations related to religious differences and cognitive capacity neither is highlighted as a separate topic Additionally the emphasis on specific groups is not meant to imply that other groups such as Euro Americans or heterosexual men do not have concerns that may differ from those of other communities and that deserve consideration in the development and implementation of programs and research endeavors However trite it may seem one text cannot do it all **Assessing Race, Ethnicity and Gender in Health** Sana Loue, 2006-12-22 This book deals specifically with the historical basis for use

of terms in race gender ethnicity sex and sexual orientation It brings much needed clarity to the debate by identifying the ethical issues as well as the technical challenges inherent in measuring these elusive concepts The author expands on her work begun in Gender Ethnicity and Health Research by paralleling the evolution of racial and sexual categories with the development of health research In addition the book provides a salient guide to assessment tools currently used in measuring racial and sexual constructs identity and experience
