Digital Television Systems Marcelo S. Alencar, 2009-03-19 Digital television is a multibillion dollar industry with commercial systems now being deployed worldwide In this concise yet detailed guide you will learn about the standards that apply to fixed line and mobile digital television as well as the underlying principles involved The digital television standards are presented to aid understanding of new systems in the market and reveal the variations between different systems used throughout the world Discussions of source and channel coding then provide the essential knowledge needed for designing reliable new systems Throughout the book the theory is supported by over 200 figures and tables whilst an extensive glossary defines practical terminology This is an ideal reference for practitioners in the field of digital television It will also appeal to graduate students and researchers in electrical engineering and computer science and can be used as a textbook for graduate courses on digital television systems **Fuzzy Logic-Based**

Algorithms for Video De-Interlacing Piedad Brox, Iluminada Baturone Castillo, Santiago Sánchez Solano, 2010-02-26 The Fuzzy Logic research group of the Microelectronics Institute of Seville is composed of researchers who have been doing research on fuzzy logic since the beginning of the 1990s Mainly this research has been focused on the microel tronic design of fuzzy logic based systems using implementation techniques which range from ASICs to FPGAs and DSPs Another active line was the development of a CAD environment named Xfuzzy to ease such design Several versions of Xfuzzy have been and are being currently developed by the group The addressed applications had basically belonged to the control eld domain In this sense s eral problems without a linear control solution had been studied thoroughly Some examples are the navigation control of an autonomous mobile robot and the level control of a dosage system The research group tackles a new activity

with the work developed in this book the application of fuzzy logic to video and image processing We addressed our interest to problems related to pixel interpolation with the aim of adapting such interpolation to the local features of the images Our hypothesis was that measures and decisions to solve image interpolation which traditionally had been done in a crisp way could better be done in a fuzzy way Validation of this general hypothesis has been done specially in the interpolation problem of video de interlacing interlacing is one of the main tasks in video processing
