ENGLISCHER TEXT The City of Vienna is building schools since 1990 activity has been taking place within a conceptual framework provided by the School Building Programme 2000. From this date onwards schools form one of the central themes of social policy and are a leitmotiv of urban planning. The intention is that ambitious school buildings should indicate the community's area of social competence and through their function as district centres help to establish new identities. The completion of more than fifty school buildings is reason enough to conduct an interim stock taking in 1996. The selection of new schools illustrated here depicts the most successful interpretations in design terms of spaces for learning. These schoolhouses also represent an internationally important body of work in the field of contemporary Viennese architecture.
