and the subsequent reconstruction of cities especially as many of the buildings and areas rebuilt after the Second World War are now facing demolition and reconstruction in their turn Drawing together leading scholars and new researchers from across the fields of planning history architecture and geography this volume presents an historical and cultural commentary on the immediate and longer term impacts of wartime destruction The book s contents in 14 chapters cover the spread of themes from experiencing the war to reconstruction and its experiences and although many chapters draw upon the UK experience there is deliberate inclusion of some material from mainland Europe and Japan to emphasise that the experiences processes and products are not London specific A comparative book tracing destruction to reconstruction is a relative rarity and yet of the utmost importance in possessing wider relevance to post disaster reconstructions The Blitz and Its Legacy is a fascinating volume which includes war experiences of destruction architecture urban design the political process of planning and reconstruction and also popular perceptions of rebuilding Its findings provide very timely lessons which highlight the value of learning from historical precedent

Genocide, War Crimes and the West Doctor Adam Jones,2013-07-04

Genocide and war crimes are increasingly the focus of scholarly and activist attention Much controversy exists over how precisely these grim phenomena should be defined and conceptualized Genocide War Crimes in most cases their contributions are specifically written for this volume In the opening and closing sections of the book analytical issues are considered including questions of responsibility for genocide and war crimes and institutional responses at both the domestic and international levels The central section is devoted to an unprecedentedly broad range of original case studies of western involvement or alleged involvement in war crimes and genocide At a moment in history when terrorism has become a near universal focus of public attention this volume makes clear why the West as a result of both its historical legacy and contemporary actions so often excites widespread resentment and opposition throughout the rest of the world

The Dresden Firebombing Tony Joel,2020-04-30 The firebombing of Dresden marks the terrible apex of the European bombing war In just over two days in February 1945 over 1 300 heavy bombers from the RAF and the USAAF dropped nearly 4 000 tonnes of explosives on Dresden s civilian centre Since the end of World War II both the death toll and the motivation for the attack have become fierce historical battlegrounds as German feelings of victimhood complete with those of guilt and loss The Dresden bombing was used by East Germany as a propaganda tool and has been re appropriated by the neo Nazi far right Meanwhile the rebuilding of the Frauenkirche the city s sumptuous eighteenth century church destroyed in the raid became central to German identity while in London a statue of the Commander in Chief of RAF Bomber Command Sir Arthur Harris has attracted protests In this book Tony Joel focuses on the historical battle to re appropriate Dresden and on how World War II continues to shape British and German identity today

The Heritage of War Martin Gegner, Bart Ziino, 2011-08-16 The Heritage of War is an interdisciplinary study of the ways in which heritage is mobilized in remembering war and in reconstructing landscapes political systems and identities after conflict It examines the deeply contested nature of war heritage in a series of places and contexts highlighting the modes by which governments communities and individuals claim validity for their own experiences of war and the meanings they attach to them From colonizing violence in South America to the United States Civil War the Second World War on three continents genocide in Rwanda and continuing divisions in Europe and the Middle East these studies bring us closer to the very processes of heritage production The Heritage of War uncovers the histories of heritage it charts the constant social and political construction of heritage sites over time by a series of different agents and explores the continuous reworking of meaning into the present What are the forces of contingency agency and political power that produce define and sustain the heritage of war How do particular versions of the past and particular identities gain legitimacy while others are marginalised In this book contributors explore the active work by which heritage is produced and reproduced in a series of case studies of memorialization battlefield preservation tourism development private remembering and urban reconstruction These are the acts of making sense of war they are acts that continue long after violent conflict itself has ended

Bombing, States and Peoples in Western Europe 1940-1945 Claudia Baldoli, Andrew Knapp, Richard Overy, 2011-06-30 This is the first book to treat bombing during WWII as a European phenomenon and not just the Blitz on Britain and Germany With Western Europe now at the heart of a united continent it is

even more difficult to explain how only 70 years ago European states destroyed much of the urban landscape from the air There were many blitzes between 1940 and 1945 with an estimated 700 000 people killed The purpose of this book is to provide the basis for a comparison of the experience of western states under the impact of bombing In particular it considers the political cultural and social responses to bombing rather than the military strategic and social dimensions which have formed the core of the discussion hitherto This book will correct the popular perception of the British Blitz as the key bombing experience by exposing the reality of life under the bombs for communities as far apart as Brest Palermo and Rostock An international panel of historians consider the issues raised amidst the bombing of human rights and protection of civilians in this seminal event in C20th history
