Sun Aiden Garabed Farrell, 2013-03-29 Aiden Farrell's *No time under the sun* strikes an incredible balance between innocence and maturity. One has the impression of looking at human experience through the eyes of a bearded old man who somehow remembers the electric emotions of youth. Love, regret, anger, violence, and happiness are all approached with wonderment and technical mastery. After reading this collection, we should all look forward to seeing Farrell's future work as he grapples with the million things that have escaped into history. *Self of the after noon* Brian Brazeau Academic Dean A mystical, mysterious, and enchanting journey into the self. One feels light and youthful upon reading these poems. Maryama Antoine English Teacher Aiden Farrell's collection of poems is impressive as it drums its way literally through familiar forests across rain-drenched streets and up into the imperial home of the clouds. His fine-tuned ear is magical in his poetry; he skillfully employs internal rhymes, alliteration, and consonance while creatively managing syntactical structures in poems such as *Summer Celebration of the Eternal Dawn of Moon and Sun* and *No Time Under the Sun* that show his experience as a percussionist. Even more impressive is the range of fresh and striking images that flow from his pen to accentuate traditional themes of innocence. *Woman and the Wide Open Sky Above to defiance Watery and Cut Me Up to celebration Skin and finally to loss the elegaic Jean*. In today's environmentally conscious world, Farrell's rich allusions to the natural world re-energize the call for preserving our maternal Earth, but in the end, his collection is about words and the power of poetry: words that may disappear into the grasses as he searches for them in the poem *Excerpt from Autumn Manifests* and all throughout the collection he talks of finding his lost words but someone should tell him: *Your words have been there all along*. Bravo! It is apt then that the final lines of his final poem *dyeing discover* Farrell declaring softly that creativity arrives and makes his thoughtlessness and cloudy windows clear without a sound. John Kim English Teacher Aiden has given us a collection which resonates with maturity of subject and voice. We can see the self emerging through the lines: vulnerable and joyous. Duncan McEarchen English Teacher Reports from Commissioners Great Britain. Parliament. House of Commons, 1879

Interhemispheric Water Exchange in the Atlantic Ocean G.J. Goni, P. M. Rizzoli, 2003-11-12 Recent results from modeling and observational studies demonstrate that the tropical Atlantic is a critical region for processes that maintain the meridional overturning circulation such as cross equatorial exchanges and for sea surface temperature variability that impacts on climate variability of the coupled tropical ocean atmosphere system The theme of this book is the inter hemispheric and inter gyre exchanges of heat salt and fresh water while its goal is to improve the knowledge of the tropical Atlantic dynamics and how it affects the global ocean A clear understanding of the dynamics of processes that affect the flow of mass and heat between the southern and the northern hemispheres in the upper few hundred meters in the tropical Atlantic and of those associated to the ocean circulation or to surface signals from decadal inter annual to mesoscale periods becomes necessary to better evaluate their contribution to the interhemispheric mass exchange These processes are believed to be largely responsible in driving the sea surface temperature which in turn is a critical parameter to investigate ocean atmospheric interactions Output produced by regional models is also used to complement the observations and to provide additional information on their spatial and

temporal variability The subtropical cells by bringing water masses subducted in the subtropics to the equator and zonal currents investigated here contribute to the interhemispheric water exchange Special attention is also given to the warm and salty anticyclonic rings shed by the North Brazil Current which are now known to have a much broader impact not only on interhemispheric water mass transfer but also on the environment of remote regions Observations from different sources are blended together are used to validate model outputs and are also assimilated into models to obtain a more complete and accurate picture of the oceanic circulation and of its time evolution
