neurophysiology among others In the process Tomkins practically invented the field of nonverbal behavior through close observation of emotional expressions in people including his own infant son His work was a brilliantly eccentric pastiche of ideas that adhered to no strict disciplinary or ideological boundaries In time however AIC came to prominence through the research of his disciples notably Paul Ekman and Carroll Izard who went on to become major researchers in the psychology of emotion Today Tomkins's book is influential not just in psychology but in philosophy sociology communication studies even in affective computing Springer Publishing Company is pleased to continue to offer this magisterial work in four volumes

The Fabric of Affect in the Psychoanalytic Discourse Andre Green, 2003-09-02 The Fabric of Affect in the Psychoanalytic Discourse is a seminal work on one of the most neglected topics in psychoanalysis that of affect Originally published in French as *Le Discours Vivant* and by one of the most distinguished living analysts the book is structured in three parts Affect within psychoanalytic literature Clinical practice of psychoanalysis structure and process Theoretical study affect language and discourse negative hallucination Written in a clear lucid style connecting theory to both culture and clinical practice this book will appeal to psychoanalysts and psychotherapists and also to those involved in cultural studies

Affect Imagery Consciousness Silvan S. Tomkins, PhD, 2008-02-15 brilliant Malcolm Gladwell Author of *Blink* The writings for which this essay is offered as a Prologue consumed him from the mid 1950s through the end of his life in 1991 Knowing it was his lifework Tomkins conflated life and work reifying the superstition that its completion would equal death and refusing to release for publication long completed material He knew the risks associated with this obsessive neurotic behavior and the results were as bad as predicted The first two volumes of Affect Imagery Consciousness AIC were released in 1962 and 1963 Volume III in 1991 shortly before he succumbed to a particularly virulent strain of small cell lymphoma and Volume IV a year after his death This last book contains Tomkins's understanding of neocortical cognition ideas that are even now exciting but until this current publication of his work as a single supervolume almost nobody has read it The bulk of his audience had died along with the enthusiasm generated by his ideas Big science is now more a matter of big machines and unifocal discoveries as the basis for pars pro toto reasoning than big ideas based on the assembly and analysis of all that is known Tomkins ignored nothing from any science past or present that might lead him toward a more certain understanding of the mind Every idea every theory deserved attention if only because significant observations can loiter in blind alleys From the Prologue by Donald L Nathanson MD Volume 1 of Springer's magisterial new two volume edition of Tomkins's magnum opus comprises *The Positive Affects and The Negative Affects*

Behavior Analysis and Modeling of Traffic Participants Xiaolin Song, Haotian Cao, 2022-06-01 A road traffic participant is a person who directly participates in road traffic such as vehicle drivers passengers pedestrians or cyclists however traffic accidents cause numerous property losses bodily injuries and even deaths to them To bring down the rate of traffic fatalities the development of the intelligent vehicle is a much valued technology nowadays It is of great significance to the decision making and

planning of a vehicle if the pedestrians intentions and future trajectories as well as those of surrounding vehicles could be predicted all in an effort to increase driving safety Based on the image sequence collected by onboard monocular cameras we use the Long Short Term Memory LSTM based network with an enhanced attention mechanism to realize the intention and trajectory prediction of pedestrians and surrounding vehicles However although the fully automatic driving era still seems far away human drivers are still a crucial part of the road driver vehicle system under current circumstances even dealing with low levels of automatic driving vehicles Considering that more than 90 percent of fatal traffic accidents were caused by human errors thus it is meaningful to recognize the secondary task while driving as well as the driving style recognition to develop a more personalized advanced driver assistance system ADAS or intelligent vehicle We use the graph convolutional networks for spatial feature reasoning and the LSTM networks with the attention mechanism for temporal motion feature learning within the image sequence to realize the driving secondary task recognition Moreover aggressive drivers are more likely to be involved in traffic accidents and the driving risk level of drivers could be affected by many potential factors such as demographics and personality traits Thus we will focus on the driving style classification for the longitudinal car following scenario Also based on the Structural Equation Model SEM and Strategic Highway Research Program 2 SHRP 2 naturalistic driving database the relationships among drivers demographic characteristics sensation seeking risk perception and risky driving behaviors are fully discussed Results and conclusions from this short book are expected to offer potential guidance and benefits for promoting the development of intelligent vehicle technology and driving safety

Driving Behavior Alfred T. Handbook of Applied Dog Behavior and Training, Procedures and Protocols Steven R. Lindsay, 2013-05-31 The Handbook of Applied Dog Behavior and Training series provides a coherent and integrated approach to understanding and controlling dog behavior In Volume 3

various themes introduced in Volumes 1 and 2 are expanded upon especially causally significant social biological and behavioral influences that impact on the etiology of behavior problems and their treatment Ethological observations relevant behavioral and neurobiological research and dog behavior clinical findings are reviewed and critiqued in detail Many of the training concepts procedures and protocols described have not been previously published making this book a unique contribution to dog behavior and training literature

Metamorphosis Ernest G. Schachtel, 2013-04-15 First published in 1959 Metamorphosis remains one of the great works of developmental psychology of the past century From his thoughtful meditation on the assumptions of classical Freudian psychoanalysis among them the pleasure and reality principles the relations of drive and affect and the nature and causes of infantile amnesia Schachtel moves on to profound reflections on the senses considered both in terms of their evolving relation to one another during maturation and as variable ingredients in the perception and cognition of the adult

Pirooz Sholevar, 1995 Conduct disorder is the most prevalent emotional disorder in children and adolescents and therefore requires special attention from clinicians Conduct Disorders in Children and Adolescents is first in providing a comprehensive and balanced view of this field It addresses the biological psychological and interpersonal aspects of aggressive behavior and conduct disorders and includes the most current clinical research Conduct Disorders in Children and Adolescents first examines the phenomenology etiology and diagnosis of conduct disorders then describes therapeutic and preventive interventions It covers the range of treatments now available including individual family group and behavior therapy hospitalization and residential treatment Special chapters address the new therapeutic interventions of pharmacotherapy and parent management training

The Problem of Affective Nihilism in Nietzsche Kaitlyn Creasy, 2020-06-10 Nietzsche is perhaps best known for his diagnosis of the problem of nihilism Though his elaborations on this diagnosis often include descriptions of certain beliefs characteristic of the nihilist such as beliefs in the meaninglessness or worthlessness of existence he just as frequently specifies a variety of affective symptoms experienced by the nihilist that weaken their will and diminish their agency This affective dimension to nihilism however remains drastically underexplored In this book Kaitlyn Creasy offers a comprehensive account of affective nihilism that draws on Nietzsche's drive psychology especially his reflections on affects and their transformative potential After exploring Nietzsche's account of affectivity illuminating especially the transpersonal nature of affect in Nietzsche's thought and the phenomenon of affective nihilism Creasy argues that affective nihilism might be overcome by employing a variety of Nietzschean strategies experimentation self narration and self genealogy

Beyond the Symbiotic Orbit Salman Akhtar, Henri Parens, 2013-05-13 In this tribute to Selma Kramer eminent child analyst and colleague and close friend of the late Margaret Mahler senior analysts explore the continuing relevance of Mahler's separation individuation theory to developmental and clinical issues Editors Salman Akhtar and Henri Parens have grouped the original contributions to Beyond

the Symbiotic Orbit into sections that reevaluate Mahler's theory. Section I is a timely reassessment of Mahler's working model from the standpoint of contemporary clinical and research findings. It includes comparisons of Mahler with Winnicott and Kohut and commentaries on the status of separation-individuation theory in relation to psychosexual theory, early ego development, and observational infancy research. Section II addresses the contribution of separation-individuation theory to our understanding of pathogenesis. Neurosis, severe character pathology, psychosomatic phenomena, eating disorders, and sexual perversions are among the topics of specific chapters. The final section explores the role of separation-individuation theory in the treatment of analysands of different ages and with different kinds of psychopathology; it also considers separation-individuation theory with respect to specific aspects of the treatment process, including reconstruction, transference, and termination. A fresh reappraisal of a major perspective on early development. Beyond the Symbiotic Orbit is a fitting testimonial to Selma Kramer, who has played so important a role in elaborating Mahler's theory. Following from Kramer's own example, the contributors show how separation-individuation theory, in its ability to accommodate ongoing clinical and research findings, is subject to continuing growth and refinement. They not only advance our understanding of Mahler's working model but pursue the implications of this model in new directions, underscoring the many areas of exploration that separation-individuation theory opens to us.
