Drug Couriers:

Drug Trafficking Nicole Horning, 2017-12-15 The drug trade is a lucrative business and drug traffickers find inventive ways to protect their investments Smugglers have a variety of means available to them to move large amounts of drugs between countries including underground tunnels secret pockets and even the postal service This means law enforcement officials must be clever and creative in their pursuit of these criminals Readers learn how police target drug traffickers and what they can do to pursue a similar career Informative sidebars fact boxes and full color photographs give a full picture of the work that law enforcement officials do to apprehend drug traffickers *Against Prediction* Bernard E.

Harcourt, 2008-09-15 From random security checks at airports to the use of risk assessment in sentencing actuarial methods are being used more than ever to determine whom law enforcement officials target and punish And with the exception of racial profiling on our highways and streets most people favor these methods because they believe they re a more cost effective way to fight crime In *Against Prediction* Bernard E Harcourt challenges this growing reliance on actuarial methods These prediction tools he demonstrates may in fact increase the overall amount of crime in society depending on the relative responsiveness of the profiled populations to heightened security They may also aggravate the difficulties that minorities already have obtaining work education and a better quality of life thus perpetuating the pattern of criminal behavior Ultimately Harcourt shows how the perceived success of actuarial methods has begun to distort our very conception of just punishment and to obscure alternate visions of social order In place of the actuarial he proposes instead a turn to randomization in punishment and policing The presumption Harcourt concludes should be against prediction **Practical**

Global Organized Crime Dina Siegel, H. Bunt, D. Zaitch, 2012-12-06 In the current processes of political economic and cultural changes serious cross border forms of organized crime receive unprecedented attention as spectacular global media events as threats of all sorts and as priority targets of criminal policy and political agendas Most books on global organized crime focus on one particular region topic or event and are written from one specific theoretical and disciplinary framework The renowned scholars who have contributed to this volume present up to date expertise on regions as distant and different as Russia Colombia the Netherlands Israel Peru and Britain They tackle phenomena such as international drug trafficking alien and women smuggling terrorism East European organized crime and financial crimes They show not only how these issues are interrelated but also the way in which they interact with social economic and political legitimate structures The contributors critically question the policies and strategies currently pursued They explore different theoretical arguments from the perspective of their own disciplines which include economics criminology political science and anthropology FBI Law Enforcement Bulletin , 1991 **Profiles, Probabilities, and Stereotypes** Frederick Schauer, 2009-07-01 When the law makes decisions about groups based on averages the public benefit can be enormous On the other hand profiling and stereotyping may lead to injustice As Schauer argues there is good profiling and bad profiling If we can effectively determine which is which we stand to gain not lose a measure of justice The Politics of Controlling Organized Crime in Greater

China Sonny Shiu-Hing Lo, 2015-12-14 In China the central government has the political will to control organized crime which is seen as a national security threat The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments The development of prostitution underground gambling and narcotics production has become so serious that the central government has to rely on anti crime campaigns to combat these three evils This book explores the specific role of government institutions and agencies notably the police in controlling organised and cross border crime in Greater China Drawing heavily on original empirical data it compares the both the states of the People s Republic of China and Taiwan as well as city states Hong Kong and Macao This region has become increasingly economically integrated and human interactions have been enhanced through improved trade relations tourism and increased individual freedom The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti crime campaigns It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political criminal nexus Focusing on regime capacity in crime control regime autonomy from crime groups and regime legitimacy in the fight against organized crime this thought provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly
