Drugs, Crime, and Their Relationships Glenn D. Walters, 2014 *An Essential Text*. Unlike any other in the field, surveys administered to high school students, studies carried out on jail and prison inmates, and interviews conducted with substance abusers undergoing treatment all point to the same conclusion: drugs and crime are strongly connected. Why they are connected is less well understood, however. Written for middle to upper-level undergraduate courses on drugs and crime, or substance abuse and crime, this book examines the drug-crime connection in a systematic and comprehensive way. *Drugs, Crime, and Their Relationships* covers the entire drug-crime spectrum, starting with a review of drug and crime terminology, classification, and theory, and ending with policy implications for prevention, harm reduction, and macro-level management of the drug-crime problem. The opening chapters discuss drugs and crime separately for the

purpose of setting the stage for later discussions on drug crime relationships As the book proceeds the boundaries between drugs and crime blur thus revealing the complex and intimate relationship that links these two behaviors **Drugs Crime and Their Relationships** is divided into four sections The first section offers an introduction and overview of theories on drugs crime and their relationships The second section explores the relevant research on the biological psychological sociological and static situational correlates of drug crime relationships The third section considers the practical implications of drug crime connections for the criminal justice system offender assessment and treatment programming The fourth and final section examines the policy implications of the drug crime relationship in the form of prevention harm reduction and society's response to drugs and drug related crime Students will enjoy the engaging writing style instructors will welcome the logical manner in which the text is organized and scholars will appreciate the comprehensiveness of coverage and the range of citations Provides a step by step breakdown and synthesis of the drug crime connection Organized logically so that a student first progresses through chapters that treat drugs and crime separately gradually replaced by overlapping discussion of drugs and crime up until the final section policy where the overlap is nearly complete Covers core topics including the history of drugs and crime in America theories of substance abuse DSM IV criteria for substance abuse antisocial personality disorder theories of crime and neurotransmitters and drugs Also includes discussions on important topics not commonly found in other texts including meta analysis genetics of drug use and crime drug diversion programs prison based treatment programs for drug offenders evidence based intervention harm reduction Portuguese and Dutch experiments and much more Pedagogical features Chapter opening learning objectives and chapter ending summary and critical thinking questions List of key words in each chapter News Spots that highlight a related topic from the news to demonstrate the relevance of the chapter material to one's everyday life and situations Questions to Ponder following each News Spot intended to stimulate critical thinking and classroom discussion Every new printed copy is packaged with full student access to the companion website featuring a wealth of engaging and interactive study tools Instructor resources include PowerPoint Lecture Outlines and a Test Bank **Drugs Crime and Their Relationships Theory Research Practice and Policy** is written for middle to upper level undergraduate students enrolled in courses on drugs and crime or substance abuse and crime Courses can be found in numerous departments including Criminal Justice Criminology Social Work Political Science Psychology and Sociology 2014 488 pages

Drug Smuggling and Taking in India and Burma Roy K. Anderson, 2020-07-24 Excerpt At a time when the drug evil as it is called is attracting so much attention all over the world it does not seem out of place to tell the public something about how conditions in regard to it obtain in India and Burma As far

as I have been able to ascertain there is no literature on this subject outside blue books and those admirable compilations are notoriously dry reading A novel called Dope by Sax Rohmer professes to deal with the drug evil and the traffic in drugs in the West but it is a novel has a hero a heroine a forbidding type of detective and some degenerates and a few impossible Chinamen in it to give verisimilitude to the title and all that it implies I do not profess to write as an authority on the subjects I have taken up I realise that there are scores of others more experienced and infinitely better able to make a book on these subjects than I am but there seems to be little hope of their ever getting the better of their modesty and appearing in print I write iv of what I have seen for myself and ventilate opinions I have formed which I expect no one to subscribe to who differs from them My readers may rest assured however that what I relate is true I have not consciously exaggerated nor have I suppressed facts I write on a subject in which I am interested and if the attention that has at different times been given to my verbal accounts is an indication of something more than the polite toleration of the raconteur then there are others also who are interested and I need offer no apologies for my attempt to supply a deficiency in the bookshelves of those who want more information
